HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

HumReprod 2016;31:2471–2483

The authors would like to apologize for an error in a section of the Materials and methods of the above article. The section titled Recovery of rabbit embryos stated that *in vivo* embryos were collected from oviducts at the 1-cell, 2-cell, 4-cell, 8-cell, 16-cell, morula and blastocyst stages. The time point stated for collection of *in vivo* 8-cell embryos was mistakenly stated as 49 hpc (hours post-coitum). The correct time point for collection of *in vivo* 8-cell embryos is 39 hpc. The authors would like to assure readers that this error does not affect any other content of the article.
