HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Corrigendum to

“Analysis of the French insurance market exposure to floods: a stochastic model combining river overflow and surface runoff” published in Nat. Hazards Earth Syst. Sci., 14, 2469–2485, 2014

The Eqs. (1), (2), and (3) in this paper contain an error.
The whole equation appears twice in all three cases.

Please find below the correct versions of the equations.

$$r = p - etp, \quad (1)$$

$$\frac{\delta h}{\delta t} = r - i + q_{in} - q_{out}(-riv), \quad (2)$$

$$\frac{\delta \theta}{\delta t} = i - l + u_{in} - u_{out}, \quad (3)$$
