HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

It has been drawn to the attention of the authors that in Figure 1 the common intermediate products of the transformation of progesterone and 5,16 androstadien-3 β ol into androstenone is 4,16-androstadien-**3-ene** (and not 4,16 androstadien-**3-one**). In addition, the list of the final products of androstenone sulfonation has been completed.

This corrigendum published in issue 5, 2008 is freely available in electronic form on the web site of GSE (<http://www.gse-journal.org/>).
