Submitted on 2 Jun 2020

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Wednesday, 22. May 2019

OPENING CEREMONY / SÉANCE INAUGURALE
08:30 - 09:00

Auditorium

Opening Ceremony/Séance inaugurale

PAUL BROCA CONFERENCE / CONFÉRENCE PAUL BROCA
09:00 - 10:00

Auditorium

PL01, Robert Malenka

Chairs:

J. Caboche

Neural mechanisms of social reward / Mécanismes neuraux de la récompense sociale

R.C. Malenka (Stanford)

POSTER SESSION / COMMUNICATIONS AFFICHÉES
10:00 - 11:00

Foyer

P1, Poster session 1

Poster sessions run from 10:00 to 11:00 and from 13:00 to 17:30 every day. However, a one hour time block is dedicated to discussion with the authors:

- from 10:00 to 11:00 for even-numbered posters
- from 14:30 to 15:30 for odd-numbered poster

The following posters can be viewed today:

Development, synaptic plasticity

Lis1 progenitor mechanisms contribute to cortical malformations

R. Belvindrah (Paris)

Local control of protein synthesis for cortical inhibitory wiring

C. Bernard (London)

Organization and role of actin at the presynapse

D. Bingham (Marseille)

Unique properties of early-born GABAergic cells in the developing and adult hippocampus

M. Bocchio (Marseille)

Time course of α -actinin-2 expression within the dentate gyrus during epileptogenesis in the rat pilocarpine model of mesial temporal lobe epilepsy suggests its role in dendritic spines plasticity of hippocampal granule cells

A. Bole (Marseille)

Scientific Programme

Heavytail stories: GABAergic topologies during development

Y. Bollmann (Marseille)

Selective axonal distribution of the Kv1 channel complex in pre-myelinated GABAergic neurons

G. Bonetto (Marseille)

Regulation of AMPAR intracellular transport through its interaction with 4.1N

C. Bonnet (Bordeaux Cedex)

Transient receptor potential cation channel subfamily M member 5 (TRPM5) activation is required for thermosensitive plateau potentials in lumbar motoneurons contributing to postural control

R. Bos (Marseille)

Elucidating the function of Huntingtin in the postnatal maturation of brain activity

B. Braz (La Tronche)

Proteomic study of Huntington's disease growth cone: identification of new players in axonal growth

M. Capizzi (La Tronche)

Role of Huntingtin in axonal growth of cortical neurons

R. Carpentier (La Tronche)

The source of enkephalin release in the hippocampal area CA2

S. Cassim (Paris)

Linking embryonic origin and pyramidal cell diversity in hippocampal CA1

D. Cavalieri (Marseille)

Identification of new protein partners of the serotonin 5-HT₆ receptor involved in its neurodevelopmental functions

S. Chaumont Dubel (Montpellier Cedex)

Control of neural stem cell specification in the postnatal forebrain by antagonist function of Vax1 and Pax6

N. Coré (Marseille)

Role of synaptic plasticity in AMPA receptor intracellular trafficking

F. Coussen-Choquet (Bordeaux)

Emergence of cell assemblies in the developing hippocampus

R.F. Dard (Marseille)

Role of omega-3 derivatives in synaptic plasticity

M. Di Miceli (Bordeaux)

Development of nanoscopic correlative imaging (X-ray/photonic) to study the role of metals in the neuronal cytoskeleton

F. Domart (Bordeaux)

3D analysis of neural network remodeling in pancreatic cancer

C. Dominici (Marseille)

Roles of Nav1.6 channels into the operation of the spinal locomotor network

B. Drouillas (Marseille)

Scientific Programme

Complement C4 overexpression in the mouse prefrontal Cortex recapitulates schizophrenia-associated endophenotypes

M. Druart (Paris)

Beyond the looking glass in the Congenital Mirror Movement paradigm: a single pathway for RAD51, NTN1 and DCC in the development of the nervous system?

C. Dubacq (Paris)

Neuroprotective effect of maternal polyphenol supplementation during hypoxia-ischemia of the newborn

U. Dumont (Bordeaux)

Spatio-temporal pattern of serotonin 5-HT6 receptors expression during neurodevelopment: potential role in wiring neuronal networks

V. Dupuy (Montpellier)

Early pathological signs of hypoexcitability are specific to delayed-onset firing motoneurons in superoxide dismutase 1 (SOD1) postnatal mice

J. Durand (Marseille)

Signalisation, cellular communications

Functional impact of TCF12 mutation in oligodendrogliomas

S. Achonditi (Paris)

Chronic stress suppresses hippocampal neurogenesis via the CDK5-Huntingtin pathway

F. Agasse (La Tronche)

Fast 3D acquisition of neuronal activity in visual cortex across multiple layers in awake mice

W. Akemann (Paris)

Dopamine and glutamate receptor heteromers: modulation and roles in cocaine-evoked adaptations

A. Andrianarivelo (Paris)

A possible link between KCNQ2- and STXBP1-related encephalopathies: STXBP1 reduces the inhibitory impact of syntaxin-1A on M current

L. Aniksztejn (Marseille)

Oxidative stress-induced disulfide dimerization of neuronal calcium sensor proteins

V. Baksheeva (Moscow)

Influence of the fungal anorexigenic toxin DON on the ER stress status in hypothalamus and liver

R. Barbouche (Marseille)

Role of GABAergic synapses of oligodendrocyte progenitors in regulating axonal myelination and function of cortical parvalbumin interneurons

N. Benamer (Paris)

Molecular and functional characterization of LIMK2-1, a hominidae-specific isoform of LIMK2 associated with intellectual disability

H. Bénédicti (Orléans Cedex)

Neurobeachin and the kinesin KIF21B are critical for endocytic recycling of NMDA receptors and regulate social behavior

K. Brune (Hamburg)

Scientific Programme

The dendritic Ca²⁺ and K⁺ currents associated with the climbing fibre synaptic potential in the cerebellar Purkinje neuron

M. Canepari (Saint Martin d'Herès)

Vesicular treadmilling in axons defines how synapses adapt to high neuronal demand

M. Cazorla (Grenoble)

Role of the WNK-SPAK-OSR1 signaling pathway in neuronal chloride homeostasis and in epilepsy

E. Côme (Paris)

Gene expression profiling and pathway analysis in brain-derived microvascular endothelial cells treated with TWEAK and TNF cytokines

J.-P. Dales (Marseille)

Role of Pyk2 in the nucleus accumbens D1 neurons in acute locomotor effects of cocaine

B. De Pins (Paris)

Impact of membrane composition in polyunsaturated fatty acids on dopamine D2 receptor affinity and signaling

V. De Smedt-Peyrusse (Bordeaux)

KCC2 enhancers: targeting neuronal chloride transport in temporal lobe epilepsy

F. Donneger (Paris)

Effect chitinase 3-like protein 1 on oligodendrocyte precursor cells proliferation and differentiation in vitro

L. du Trieu de Terdonck (Montpellier)

Direct and non-invasive probing of the polarity of perisomatic GABAergic transmission in the adult mouse hippocampus in vivo

O. Dubanet (Bordeaux)

Helping analgesia by targeting the serotonin 5-HT₇ receptor

C. El Khamlichi (Orleans)

Identification of the underlying pathogenic pathways in a mouse model in Hereditary Spastic Paraplegia SPG11 through transcriptional study

T. Esteves (Paris)

The role of monocarboxylate transporter-1 on cognitive deficits development during non-alcoholic fatty liver disease

A. Hadjichambi (Lausanne)

Neurological and psychiatric diseases, experimental therapeutics

Pre-clinical evaluation of checkpoint inhibitor immunotherapy in GBM implementing ultrasound Mediated blood-brain barrier opening (UMBO)

M. Ahmed (Paris)

Preliminary study of the prevalence of the G2019S mutation in the Leucine-Rich Repeat Kinase-2 gene in patients with parkinson's disease in the South-West of Morocco

S. Ait Wahmane (Agadir)

Epigenetic control of brain wiring: role of axonal miRNAs in fetal alcohol spectrum disorders

M. Altounian (Marseille)

Scientific Programme

Role of Tshz3 in the development and function of corticostriatal connections and its involvement in ADS-like behavior

E. Arbeille (Marseille)

Human induced pluripotent stem cell-based Alzheimer's disease modeling reveals APOE4 as a modulator of inflammation

L. Arnaud (Marseille)

Sucrose bingeing alters reward processing: role of mu opioid receptors

G. Awad (Strasbourg)

Molecular mechanisms underlying altered epigenetic regulation in Huntington's disease: role of SRF

A. Awada (Strasbourg)

Gene therapy for spinocerebellar ataxia 7: restoring cholesterol metabolism

E.-G. Banchi (Paris)

The pro-amyloidogenic effects of membrane-type-matrix metalloproteinase involve MMP-2 and BACE-1 activities, and the modulation of APP trafficking

K. Baranger (Marseille)

Conditional inactivation of the translation initiation factor eif2b5 gene in oligodendrocytes induced a delayed acute neurological distress

A. Bark (Paris)

Early events in cytomegalovirus infection of the developing rat brain: a pathophysiological role for viral chemokine r129?

S. Bauer (Marseille Cedex 09)

Role of the BLA-ACC pathway in major depressive disorder

L.J. Becker (Strasbourg)

Facilitating glutamate mGlu4 receptor activity relieves autistic-like deficits in Fmr1 knockout mice

J.A. Becker (Nouzilly)

Major depression: metabolomic signature of treatment response and of remission

C. Belzung (Tours)

Repeated inhalation of aerosols containing titanium dioxide nanoparticles reveals potential neurotoxicity in mouse

A. Bencsik (Lyon)

Short-term memory deficits and CA3 hippocampal damage in a murine model of lupus

M. Bendorius (Illkirch)

Links between Parkinson's disease, dopaminergic agonist treatment and cognitive flexibility

M. Benoitmarand (Poitiers)

Characterization of glioblastoma stem cells: identification of factors involved in their transcriptome regulation

N. Berabez (Lyon)

The mGlu7 receptor provides protective effects against epileptogenesis and epileptic seizures

F. Bertaso (Montpellier)

Scientific Programme

Variable selection using machine-learning to identify new signatures of patient-derived aggregated α -synuclein-induced neurodegeneration in non-human primates

E. Bezard (Bordeaux)

Ex-vivo electrophysiological analysis of a mouse model carrying a KCNQ2 variant associated with early epileptic encephalopathy

N. Biba (Marseille)

Deciphering preventive action of vitamin A on Alzheimer's disease pathology

E. Biyong (Bordeaux)

Neuro-microglial communication contributes to the detrimental role of adenosine A2A receptors in Alzheimer's disease

D. Blum (Lille)

Mimicking schizophrenia symptoms in mice by combining factors: genetic, early environmental stress and late pharmacological conditioning

V. Bouet (Caen)

Regulation of dopamine and endocannabinoid transcripts in reward and homeostatic brain regions following diet-induced obesity in rats: a cluster analysis approach

R. Bourdy (Strasbourg)

Complement-C3-dependent alterations of the dentate gyrus are involved in memory deficit at the early stage of experimental multiple sclerosis

J. Bourel (Bordeaux)

Ganglioside accumulation in a model of slowly progressive Amyotrophic Lateral Sclerosis

J. Branchu (Paris)

Stable analogue of diadenosine-polyphosphates, AppCH2ppA, suppresses epilepsy by enhancing adenosine signaling in neocortex

N. Burnashev (Marseille)

Hippocampal rhythmic activity modifications associated to epileptogenesis and ictogenesis in a mouse model (Scn1aR1648/+) of genetic epilepsy

F. Capitano (Sophia Antipolis - Valbonne)

Effect of anti-VEGF treatment on the innate immune response in a mouse model of multiple sclerosis

C. Caravagna (Marseille)

Brain insulin sensitivity and peripheral metabolic changes in Tau transgenic mice

K. Carvalho (Lille)

A new conditional mouse model allowing the adult truncation of FUS-PY NLS domain to study ALS-FTD

R. Cassel (Strasbourg)

Re-expression of the neurodevelopmental protein filamin A in glioblastoma: major impact on tumor proliferation and invasiveness

H. Castel (Mont Saint Aignan)

Pathogenicity of TDP-43 fragments in Amyotrophic Lateral Sclerosis

A. Chami (Tours)

The role of dopamine in nociceptive transmission in a rat model of Parkinson's disease

K.-A. Charles (Bordeaux)

A. Desmazieres (Paris)

POSTER SESSION / COMMUNICATIONS AFFICHÉES
13:00 - 17:30

Foyer

P1, Poster session 1

Poster sessions run from 10:00 to 11:00 and from 13:00 to 17:30 every day. However, a one hour time block is dedicated to discussion with the authors:

- from 10:00 to 11:00 for even-numbered posters
- from 14:30 to 15:30 for odd-numbered poster

The following posters can be viewed today:

Development, synaptic plasticity

Lis1 progenitor mechanisms contribute to cortical malformations

R. Belvindrah (Paris)

Local control of protein synthesis for cortical inhibitory wiring

C. Bernard (London)

Organization and role of actin at the presynapse

D. Bingham (Marseille)

Scientific Programme

Unique properties of early-born GABAergic cells in the developing and adult hippocampus

M. Bocchio (Marseille)

Time course of α -actinin-2 expression within the dentate gyrus during epileptogenesis in the rat pilocarpine model of mesial temporal lobe epilepsy suggests its role in dendritic spines plasticity of hippocampal granule cells

A. Bole (Marseille)

Heavytail stories: GABAergic topologies during development

Y. Bollmann (Marseille)

Selective axonal distribution of the Kv1 channel complex in pre-myelinated GABAergic neurons

G. Bonetto (Marseille)

Regulation of AMPAR intracellular transport through its interaction with 4.1N

C. Bonnet (Bordeaux Cedex)

Transient receptor potential cation channel subfamily M member 5 (TRPM5) activation is required for thermosensitive plateau potentials in lumbar motoneurons contributing to postural control

R. Bos (Marseille)

Elucidating the function of Huntingtin in the postnatal maturation of brain activity

B. Braz (La Tronche)

Proteomic study of Huntington's disease growth cone: identification of new players in axonal growth

M. Capizzi (La tronche)

Role of Huntingtin in axonal growth of cortical neurons

R. Carpentier (La Tronche)

The source of enkephalin release in the hippocampal area CA2

S. Cassim (Paris)

Linking embryonic origin and pyramidal cell diversity in hippocampal CA1

D. Cavalieri (Marseille)

Identification of new protein partners of the serotonin 5-HT₆ receptor involved in its neurodevelopmental functions

S. Chaumont Dubel (Montpellier Cedex)

Control of neural stem cell specification in the postnatal forebrain by antagonist function of Vax1 and Pax6

N. Coré (Marseille)

Role of synaptic plasticity in AMPA receptor intracellular trafficking

F. Coussen-Choquet (Bordeaux)

Emergence of cell assemblies in the developing hippocampus

R.F. Dard (Marseille)

Role of omega-3 derivatives in synaptic plasticity

M. Di Miceli (Bordeaux)

Scientific Programme

Development of nanoscopic correlative imaging (X-ray/photonic) to study the role of metals in the neuronal cytoskeleton

F. Domart (Bordeaux)

3D analysis of neural network remodeling in pancreatic cancer

C. Dominici (Marseille)

Roles of Nav1.6 channels into the operation of the spinal locomotor network

B. Drouillas (Marseille)

Complement C4 overexpression in the mouse prefrontal Cortex recapitulates schizophrenia-associated endophenotypes

M. Druart (Paris)

Beyond the looking glass in the Congenital Mirror Movement paradigm: a single pathway for RAD51, NTN1 and DCC in the development of the nervous system?

C. Dubacq (Paris)

Neuroprotective effect of maternal polyphenol supplementation during hypoxia-ischemia of the newborn

U. Dumont (Bordeaux)

Spatio-temporal pattern of serotonin 5-HT₆ receptors expression during neurodevelopment: potential role in wiring neuronal networks

V. Dupuy (Montpellier)

Early pathological signs of hypoexcitability are specific to delayed-onset firing motoneurons in superoxide dismutase 1 (SOD1) postnatal mice

J. Durand (Marseille)

Signalisation, cellular communications

Functional impact of TCF12 mutation in oligodendrogliomas

S. Achonditi (Paris)

Chronic stress suppresses hippocampal neurogenesis via the CDK5-Huntingtin pathway

F. Agasse (La Tronche)

Fast 3D acquisition of neuronal activity in visual cortex across multiple layers in awake mice

W. Akemann (Paris)

Dopamine and glutamate receptor heteromers: modulation and roles in cocaine-evoked adaptations

A. Andrianarivelo (Paris)

A possible link between KCNQ2- and STXBP1-related encephalopathies: STXBP1 reduces the inhibitory impact of syntaxin-1A on M current

L. Aniksztejn (Marseille)

Oxidative stress-induced disulfide dimerization of neuronal calcium sensor proteins

V. Baksheeva (Moscow)

Influence of the fungal anorexigenic toxin DON on the ER stress status in hypothalamus and liver

R. Barbouche (Marseille)

Scientific Programme

Role of GABAergic synapses of oligodendrocyte progenitors in regulating axonal myelination and function of cortical parvalbumin interneurons

N. Benamer (Paris)

Molecular and functional characterization of LIMK2-1, a hominidae-specific isoform of LIMK2 associated with intellectual disability

H. Bénédetti (Orléans Cedex)

Neurobeachin and the kinesin KIF21B are critical for endocytic recycling of NMDA receptors and regulate social behavior

K. Brune (Hamburg)

The dendritic Ca²⁺ and K⁺ currents associated with the climbing fibre synaptic potential in the cerebellar Purkinje neuron

M. Canepari (Saint Martin d'Herès)

Vesicular treadmilling in axons defines how synapses adapt to high neuronal demand

M. Cazorla (Grenoble)

Role of the WNK-SPAK-OSR1 signaling pathway in neuronal chloride homeostasis and in epilepsy

E. Côme (Paris)

Gene expression profiling and pathway analysis in brain-derived microvascular endothelial cells treated with TWEAK and TNF cytokines

J.-P. Dales (Marseille)

Role of Pyk2 in the nucleus accumbens D1 neurons in acute locomotor effects of cocaine

B. De Pins (Paris)

Impact of membrane composition in polyunsaturated fatty acids on dopamine D2 receptor affinity and signaling

V. De Smedt-Peyrusse (Bordeaux)

KCC2 enhancers: targeting neuronal chloride transport in temporal lobe epilepsy

F. Donneger (Paris)

Effect chitinase 3-like protein 1 on oligodendrocyte precursor cells proliferation and differentiation in vitro

L. du Trieu de Terdonck (Montpellier)

Direct and non-invasive probing of the polarity of perisomatic GABAergic transmission in the adult mouse hippocampus in vivo

O. Dubanet (Bordeaux)

Helping analgesia by targeting the serotonin 5-HT₇ receptor

C. El Khamlichi (Orléans)

Identification of the underlying pathogenic pathways in a mouse model in Hereditary Spastic Paraplegia SPG11 through transcriptional study

T. Esteves (Paris)

The role of monocarboxylate transporter-1 on cognitive deficits development during non-alcoholic fatty liver disease

A. Hadjichambi (Lausanne)

Neurological and psychiatric diseases, experimental therapeutics

Scientific Programme

Pre-clinical evaluation of checkpoint inhibitor immunotherapy in GBM implementing ultrasound Mediated blood-brain barrier opening (UMBO)

M. Ahmed (Paris)

Preliminary study of the prevalence of the G2019S mutation in the Leucine-Rich Repeat Kinase-2 gene in patients with parkinson's disease in the South-West of Morocco

S. Ait Wahmane (Agadir)

Epigenetic control of brain wiring: role of axonal miRNAs in fetal alcohol spectrum disorders

M. Altounian (Marseille)

Role of Tshz3 in the development and function of corticostriatal connections and its involvement in ADS-like behavior

E. Arbeille (Marseille)

Human induced pluripotent stem cell-based Alzheimer's disease modeling reveals APOE4 as a modulator of inflammation

L. Arnaud (Marseille)

Sucrose bingeing alters reward processing: role of mu opioid receptors

G. Awad (Strasbourg)

Molecular mechanisms underlying altered epigenetic regulation in Huntington's disease: role of SRF

A. Awada (Strasbourg)

Gene therapy for spinocerebellar ataxia 7: restauring cholesterol metabolism

E.-G. Banchi (Paris)

The pro-amyloidogenic effects of membrane-type-matrix metalloproteinase involve MMP-2 and BACE-1 activities, and the modulation of APP trafficking

K. Baranger (Marseille)

Conditional inactivation of the translation initiation factor eif2b5 gene in oligodendrocytes induced a delayed acute neurological distress

A. Bark (Paris)

Early events in cytomegalovirus infection of the developing rat brain: a pathophysiological role for viral chemokine r129?

S. Bauer (Marseille Cedex 09)

Role of the BLA-ACC pathway in major depressive disorder

L.J. Becker (Strasbourg)

Facilitating glutamate mGlu4 receptor activity relieves autistic-like deficits in Fmr1 knockout mice

SPECIAL SYMPOSIUM / SYMPOSIUM SPÉCIALISÉ
13:15 - 14:45

Endoume 1+2

SP02, How to succeed outside academia? / Faire carrière en dehors de la recherche académique

Five speakers will present their career paths and participate in a roundtable around the following questions:

- How did you experience the transition to the non-academic world?
- Did you need to take further training?
- What skills should one emphasize to get hired in your field?
- What makes a good professional network?

The five invited professionals are:

- Joachim Confais, Chief Scientific Officer at Cynbiose
- Sébastien Jeanjean, Export Manager at Agilent Technologies
- Karine Langou, Business Manager at Institut NeuroMyoGène
- Raphaël Hitier, author and journalist, film director for Arte, animator at the French Biodiversity Agency
- Claire Lecroisey, Training and applications scientist at Promega

An HR expert from Adoc Talent Management will conclude briefly on how to succeed outside academia.

This session will be chaired by Julie Peyronnet-Roux, Aix-Marseille University lecturer in charge of professionalization at NeuroSchool.

Chairs:

J. Peyronnet-Roux

SYMPOSIUM
15:30 - 17:30

Auditorium

S08, Essential role of glial cells for neuronal activity: from image to function. / Rôle essentiel des cellules gliales pour l'activité neuronale: de l'image à la fonction.

Chairs:

A.-K. Bouzier-Sore (Bordeaux)
A. Panatier (Bordeaux)

Astrocytic glutamate uptake drives brain glucose utilization. / La recapture du glutamate par l'astrocyte module l'utilisation cérébrale du glucose.

L. Pellerin (Lausanne)

Importance of neuron-astrocyte metabolic coupling: from functional brain imaging to neuroprotection. / Importance du couplage métabolique neurone-astrocyte: de l'imagerie fonctionnelle à la neuroprotection.

Chairs:
L. Buée

Neurodevelopmental approach of autism: from physiopathology to therapeutics / Approche neuro-développementale de l'autisme, de la physiopathologie à la thérapeutique.

C. Barthélémy (Tours)

PLENARY LECTURE / CONFÉRENCE PLÉNIÈRE
09:30 - 10:00

Auditorium

PL05, Alain Chédotal

Chairs:
S. Garel

Development and evolution of axon guidance mechanisms / Développement et évolution des mécanismes de guidage axonal

A. Chédotal (Paris)

POSTER SESSION / COMMUNICATIONS AFFICHÉES
10:00 - 11:00

Foyer

P2, Poster session 2

Poster sessions run from 10:00 to 11:00 and from 13:00 to 17:30 every day. However, a one hour time block is dedicated to discussion with the authors:

- from 10:00 to 11:00 for even-numbered posters
- from 14:30 to 15:30 for odd-numbered poster

The following posters can be viewed today:

Development, synaptic plasticity

Modulation of acute inflammation in a rodent model of vestibular pathology: cellular and functional approaches.

N. El Mahmoudi (Marseille)

AMPA receptor mobility is important for spatial memory consolidation through ripples modulation

H. El Oussini (Bordeaux)

Scientific Programme

Boc acts as a Shh-dependent endocytic platform for Ptch1 internalization and Shh-mediated axon guidance

J. Ferent (Montréal)

Physiology of hippocampal Sharp Waves Ripples in vitro: importance of AMPA receptor mobility and related synaptic plasticity.

U. François (Bordeaux)

Formins modulate Axon Initial Segment cytoskeleton and plasticity

J.J. Garrido (Madrid)

Activity of Cajal-Retzius cells regulates their distribution and survival: impact on cortical wiring

I. Genescu (Paris)

KIF2A conditional mutant knock-in mouse: a flexible model to study cortical malformations

J. Gilet (Illkirch)

Optogenetic manipulation of the dendritic spine cytoskeleton

Y. Goldberg (La Tronche)

Role of sympathetic nervous system in pancreatic cancer development

J. Guillot (Marseille)

Transmembrane protein 240 (TMEM240), mutated in spinocerebellar SCA21, is involved in cerebellar afferent connections to Purkinje cells

M. Homa (Lille)

Spike timing dependent plasticity rules in physiological calcium

Y. Inglebert (Marseille)

A new population of PKD2L1 positive neurons in the ventromedial medullospinal region in link with the ependymal stem cell niche

A. Kastner (Marseille Cedex 05)

Effects of SCI on the synaptic transmission onto Axon Initial Segment of lumbar spinal motoneurons

M. Kerzouf (Marseille)

Early origins of adult disorders after postnatal sensorimotor restriction

M. Kochmann (Marseille)

A novel vector system for direct readout of neural stem cell transgenesis

T. Kumamoto (Paris)

Muscarinic control of motoneuronal activity : differential response of F and S motoneurons and presynaptic control of synaptic transmission to Renshaw cells

B. Lamotte D'incamps (Paris Cedex 06)

Locus coeruleus reduces inhibition in the cerebellar input layer through noradrenergic modulation of Golgi cells

F. Lanore (Bordeaux)

The role of microglia in the development of forebrain axonal tracts

A. Lawrence (Paris)

How direct thalamic inputs modulate hippocampal dynamics during development

E. Leprince (Marseille)

Scientific Programme

Brain activity during transitive and social action observation in adults and adolescents

M. Lesourd (Marseille)

Plasticity of thalamic axons and cortical areas is regulated by embryonic and birth-sensitive checkpoints

L. Lokmane (Paris)

The Microtubule-severing enzyme katanin is required for embryonic survival and regulates adult dentate gyrus neurogenesis

F.L. Lombino (Hamburg)

Cooperative interactions between retinal ganglion cells from the same eye shapes the connectivity of the visual system

A. Louail (Paris)

Synaptic function of 3S-HS and HS3ST2 in physiologic conditions and during Alzheimer's disease-related tauopathy

A. Maïza (Créteil)

Role of dietary n-3 polyunsaturated fatty acid in memory and hippocampal synaptic plasticity in male and female mice

M. Martinat (Bordeaux)

Signalisation, cellular communications

Neuroprotective effects of PACAP against paraquat-induced oxidative stress in the Drosophila central nervous system

K. Hajji (Paris)

Impact of Cx30 overexpression on astroglial and neuronal networks

E. Hardy (Paris)

A new mouse model to explore the role of glycine and D-serine as NMDAR co-agonists in neuronal and brain function

R. Helleringer (Paris)

Alteration of neuron morphology and type I mGlu signaling by a missense mutation of the GluD1 glutamate receptor causing intellectual disability

R. Hepp (Paris)

Molecular analysis of distinct populations of central synapses in physiology and pathology in mice

E. Herzog (Bordeaux)

Microglial motility during sleep and wakefulness

I. Hristovska (Lyon)

Measurement of ATP release from single dorsal horn spinal cord glial cells and its modulation by noradrenaline

S. Hugel (Strasbourg)

Specific downregulation of MCT2 in neurons and MCT4 in astrocytes using the AAV2/DJ in the rat barrel field of the somatosensory cortex to investigate their role in synaptic plasticity

C. Jollé (Lausanne)

Spinal CSF-contacting neurons: properties of their protrusion in contact with the CSF

N. Jurcic (Marseille)

Scientific Programme

Boc is implicated in myelin repair in the brain

A. Kassoussi (Le Kremlin-Bicêtre)

A new role of astrocytes in the central amygdala neuronal network modulation by oxytocin

D. Kerspern (Strasbourg Cedex)

Identifying the MVP/vault neuronal function at the autism-associated 16p11.2 locus

P. Kretz (Illkirch)

Extracellular vesicles from human tauopathies CSF contains pathological competent tau species

E. Leroux * (Lille)

Modulation of POMC neuronal activity by lactate in the hypothalamus

T. Lhomme (Lille)

Deciphering the molecular mechanisms of LRRTM2 trafficking and stabilisation at synapses

K. Liouta (Bordeaux)

Use of Zif::CreERT2 transgenic mice for long-lasting tagging of neurons activated by epileptic seizures or cocaine injection

S. Longueville (Paris)

Impact of neuronal activity on calcium signals of oligodendroglia during remyelination

B. Manot-Saillet (Paris)

Deciphering functional networks of ion channels in substantia nigra pars compacta dopaminergic neurons

B. Marquèze-Pouey (Marseille)

LINGO-1, a major player of myelination and neuronal survival forms heteromeric complexes: a new signaling platform

S. Morisset-Lopez (Orléans)

Robustness to axon initial segment variation in rat and mouse substantia nigra dopaminergic neurons

E. Moubarak (Marseille)

Identification of an axon-resident pool of vesicles regulated by neuronal activity

E. Moutaux (La Tronche)

The Microtubule-associated protein Tau as a new putative therapeutic target in brain cancer

A. Pagano (Marseille)

Identification of somatosensory mechanotransducer(s) by functional genomics approach

T. Parpaite (.)

Neurological and psychiatric diseases, experimental therapeutics

Development of neurotensin analogues conjugated to a brain penetrant peptide that induce hypothermia and promote efficient neuroprotection in vivo and in vitro

M. Khrestchatisky (Marseille)

Expression and distribution of Neurotensin receptors in wild-type and epileptic conditions in relation to the neuroprotective effects of vectorized Neurotensin (VH-NT)

G. Kyriatzis (Marseille)

Scientific Programme

Pathological low frequency oscillations of the subthalamic nucleus predict compulsive-like cocaine seeking in rats

M. Degoulet (Marseille)

Primary cilium: a new target for remyelination ?

G. Delfino (Strasbourg)

Chronic administration of sodium bromide relieves behavioral deficits in three different mouse models of autism

C. Derieux (Nouzilly)

Detecting brain diseases via plasma profiling

F. Devred (Marseille)

Concomitant modification of synaptic activity by IL-1 β and metalloprotease MT5-MMP in primary cortical cultures

E. Di Pasquale (Marseille)

TP53INP1 deficiency exacerbates age-related and alpha-synuclein-induced degeneration of nigral dopaminergic neurons in mice

E. Dinh (Marseille)

Influence of Quercetin-loaded magnetic nanoparticles on kainate-induced epileptiform activity in the CA1 field of the rat hippocampus

N. Doreulee (Tbilisi)

Assessment of neurodegeneration and α -synuclein pathology in clarified brain slices in animal models of Parkinson disease

E. Doudnikoff (Bordeaux)

Rare PAK3 mutations responsible for severe intellectual disability and callosal dysgenesis inhibit cell migration

K. Duarte (Orsay)

Impact of hormone-therapy used in CRPC patients: evaluation of abiraterone acetate/prednisone or enzalutamide on activity and cognitive functions in aged castrated mice

M. Dubois (Mont-Saint-Aignan)

A new procedure to quantify cortical vascular autoregulation in mouse models of epilepsy

F. Duprat (Valbonne)

The potential of motor cortical neurons derived hiPSC transplantation for brain repair following traumatic brain injury

H. El Hajj (Poitiers)

Effect of myelin remodeling on axons and oligodendrocytes in pathological conditions

B. El Waly (Marseille)

Contribution of reactive astrocytes to myelin repair

C. Escartin (Fontenay-aux-Roses)

Rescue of intrinsic excitability in CA3 neurons from LGI1-deficient mice

J. Extrémet (Marseille)

Adenosine A2A receptor dysregulation in Alzheimer's disease impact of astrocytic A2AR upsurge in a mouse mode of Tauopathy

E. Faivre (Lille)

Scientific Programme

Retinal alterations and visual dys-sensibility in the Fragile X syndrome

C. Felgerolle (Orléans)

Network effects of cerebellar non-invasive stimulation: an MEG study on dystonic patients and healthy controls

S.C. Ficarella (Paris)

LINE-1 retrotransposon repression attenuates neurodegeneration in adult dopaminergic neurons

J. Fuchs Sèbe (Paris)

MT5-MMP affects the stability of β -CTF of amyloid precursor protein, which may constitute a new potential pathophysiological mechanism in Alzheimer's disease

L. García González (Marseille)

Repair strategy for traumatic spinal cord injury; an advance in bioengineering-based preclinical approaches

C. Giraudon (Paris)

Delayed brain development in a mouse model of intellectual disability in Coffin-Lowry syndrome

L. Gonzalez (Orsay)

PM20D1 quantitative trait locus association with Alzheimer's disease: chromatin-mediated genetic-epigenetic interaction and disease progression

.

Teashirt 3 haploinsufficiency impacts the functioning of the fear/defense circuitry in mice

L. Had (Marseille Cedex)

Robustness of behavioral and electrophysiological phenotypes of SK3KO mice in Parkinsonian conditions

A. Haddjeri (Marseille)

Sex-dependent behavioral deficits and neuropathology in different ASD mouse models

O. Haïda (Poitiers)

Microglial diversity in Alzheimer's disease early stages: a key to understand the disease initiation

A.-L. Hemonnot (Montpellier)

Translocation of TDP-43 and FUS in SOD1 Tg and WT spinal cord motor neurons injured with glutamate or A β 1-42 peptide: an in vitro model of ALS

A. Henriques (Gardanne)

Respective contribution of parenchymal and plaques associated microglia during Alzheimer's Disease progression

H. Hirbec (Montpellier)

Cingulate overexpression of MKP-1 as a key factor for depression

M. Humo (Strasbourg)

Effects of 6-hydroxydopamine lesions of the substantia nigra, the dorsal striatum, the medial accumbens and the lateral accumbens on food choice (regular chow, fat, sucrose)

A. Joshi (Strasbourg)

Scientific Programme

Investigating the physiological function of the amyloid precursor protein and its relevance to Alzheimer's disease

E. Kesisoglou (Paris)

Microfluidic primary neuron co-culture to expose fluidically-isolated synapses to CHO cell-secreted oligomeric A β 42 to decipher the role of Pyk2 in Alzheimer's disease

D. Kilinc (Lille)

Unravelling alpha-synuclein aggregates nature to model and understand the diversity and variability among synucleinopathies

F. Laferriere (Bordeaux)

Validation of a cerebral chemoattractant local trap based on a "smart" hydrogel in a mouse model of glioblastoma resection

E. Laillet De Montullé (Mont-Saint-Aignan)

Absence of interleukin 33 impaired axonal outgrowth of grafted cortical neurons

A. Lainé (Poitiers)

Chronic oxytocin administration relieves social deficits in the mouse model of Fragile X syndrome

J. Le Merrer (Nouzilly)

Therapeutic effects of ADAMTS-4 and exercise in a mouse model of traumatic brain injury

S. Lemarchant (Bordeaux)

NaV1.2 haploinsufficiency in Scn2a knock-out mice results in self-limited autistic-like phenotype, with dysfunctions that are attenuated in adult compared to young mice

I. Léna (Valbonne)

Uranium, an environmental factor that accelerates and/or worsens the Alzheimer's disease?

P. Lestaevel (Fontenay aux Roses)

PET imaging of functional 5-HT1A receptors in hemiparkinsonian rats

E. Levigoureux (Lyon)

Does cooperative parent mediated therapy modify parentese prosody and improve the interaction between parent and child with autism? An Italian pilot study

M.G.M. Logrieco (Chieti)

Distorted own-body and self representations in patients with vestibular disorders and in healthy participants during caloric vestibular stimulation

C. Lopez (Marseille)

Ketamine-induced behavioural and dopaminergic responses in the core part of the nucleus accumbens in adult rats are increased following postnatal ventral subiculum functional inactivation

A. Louilot (Strasbourg)

GABAergic inhibition in dual-transmission cholinergic and GABAergic striatal interneurons is abolished in Parkinson disease

N. Lozovaya (Marseille)

Repurposing of FDA-approved pro-myelinating drugs for the treatment of glioblastomas

N. Magne (Paris)

Metabolic characterization of different phases of Parkinson's disease

D. Mallet (Grenoble)

Scientific Programme

Integrative neurosciences, sensory physiology

A spatial code in the dorsal lateral geniculate nucleus

V. Hok (Marseille)

Medial entorhinal cortex neurons signal relevant positions in a distance estimation task

P.-Y. Jacob (Marseille)

Diversity of spatially tuned neurons in dorsal lateral geniculate nucleus

J.-Y. Montenay (Marseille)

Spatial goals locally modify the grid-like firing pattern of the grid cells

F. Sargolini (Marseille)

Processing of allothetic and idiothetic cues by the medial and lateral entorhinal cortex

E. Save (Marseille)

Hippocampal LTP modulation and glutamatergic receptors following vestibular loss

B. Truchet (Marseille)

Deciphering the neural code of the motor cortex with a multidirectional reaching task in mice

G. Galiñanes (Genève)

Respiration-based synchronization in the brain: bottom-up and top-down influences

B. Girin (Lyon)

Role of somatosensory cortical feedback in a sensorimotor brain-machine interface

D. Goueytes (Gif-sur-Yvette)

Does midcingulate cortex encode choice difficulty?

C. Goussi (Bron)

Integrating information from both nostrils - random or not?

J. Grimaud (Cambridge)

Glial endozepines reverse high fat diet-induced obesity by increasing hypothalamic sensitivity to peripheral leptin

F. Guillebaud (Marseille)

The brain smells and tastes the self - lessons from the Allen Brain Atlas

G. Guiraudie-Capraz (Marseille)

Distinct neuronal drives from locomotor circuits modulate breathing during exercise

C. Herent (Gif-sur-Yvette)

Short-term impact of a western diet on the physiology of the peripheral olfactory system

D. Jarriault (Dijon)

The breath whispers in the membrane potential

M. Juventin (Lyon)

“Hearing the touch”: impact of sonification in the haptic perception of artificial textures and its modulation with aging

A. Kavounoudias (Marseille)

Scientific Programme

Intracellular dynamics of CA3 pyramidal cells in awake head-fixed mice during the theta rhythm favor sparse coding

A.L. Kees (Bordeaux)

Alteration of S1Bf cortical network during epileptogenesis in GAERS, a genetic model of absence epilepsy

E. Laghouati (Grenoble)

Modulation of corticostriatal transmission by striatal cholinergic interneurons in normal and parkinsonian conditions: electrophysiology and optogenetics ex vivo

G. Laverne (Marseille)

Role of NMDA receptors in the inhibitory synaptic transmission plasticity in the dorsal horn of the spinal cord

B. Leonardon (Strasbourg)

High resolution large volume multicolor imaging of brain tissue with chromatic multiphoton serial microscopy

J. Livet (Paris)

Astrocytes contribute to the trigeminal central sensitization and cephalic cutaneous hypersensitivity in rat model of chronic migraine

P. Luccarini (Clermont-Ferrand)

Neuroendocrinology, neuroimmunology

3D imaging of vertebral column lymphatic network in mouse

L. Jacob (Paris)

Effect of the long non-coding RNA Neat1 knock-down on the circadian transcriptome in a rat pituitary cell line

A. Jacq (Marseille)

Effect of an intranasal administration of ODN on mouse body weight

J. Leprince (Mont-Saint-Aignan)

The importance of infantile neuronal NOS-derived NO signaling for fertility, olfaction and cognition

V. Leysen (Lille)

Pregnancy is associated with the production of new glial cells in the rat hypothalamus

M. Martin (Lille)

Development of metabolic disturbances in a mouse model of polycystic ovary syndrome

N.E.H. Mimouni (Lille)

Dietary PUFAs immunomodulatory properties shape the neuronal network during development

L. Morel (Bordeaux)

The role and molecular mechanisms of the anti-FGFR3 antibody, a biomarker of sensory neuropathies inducing neuronal death

Y. Nasser (Saint-Etienne)

Implication of the plasticity of the blood/arcuate nucleus interface during the establishment of obesity

M. Piet (Lille)

Behaviour, emotions, cognition, neuroethology

Scientific Programme

POSTER SESSION / COMMUNICATIONS AFFICHÉES
13:00 - 17:30

Foyer

P2, Poster session 2

Poster sessions run from 10:00 to 11:00 and from 13:00 to 17:30 every day. However, a one hour time block is dedicated to discussion with the authors:

- from 10:00 to 11:00 for even-numbered posters
- from 14:30 to 15:30 for odd-numbered poster

The following posters can be viewed today:

Development, synaptic plasticity

Modulation of acute inflammation in a rodent model of vestibular pathology: cellular and functional approaches.

N. El Mahmoudi (Marseille)

AMPA receptor mobility is important for spatial memory consolidation through ripples modulation

H. El Oussini (Bordeaux)

Boc acts as a Shh-dependent endocytic platform for Ptch1 internalization and Shh-mediated axon guidance

J. Ferent (Montréal)

Physiology of hippocampal Sharp Waves Ripples in vitro: importance of AMPA receptor mobility and related synaptic plasticity.

U. François (Bordeaux)

Formins modulate Axon Initial Segment cytoskeleton and plasticity

J.J. Garrido (Madrid)

Activity of Cajal-Retzius cells regulates their distribution and survival: impact on cortical wiring

I. Genescu (Paris)

KIF2A conditional mutant knock-in mouse: a flexible model to study cortical malformations

J. Gilet (Illkirch)

Optogenetic manipulation of the dendritic spine cytoskeleton

Y. Goldberg (La Tronche)

Role of sympathetic nervous system in pancreatic cancer development

J. Guillot (Marseille)

Transmembrane protein 240 (TMEM240), mutated in spinocerebellar SCA21, is involved in cerebellar afferent connections to Purkinje cells

M. Homa (Lille)

Spike timing dependent plasticity rules in physiological calcium

Chairs:

L. Kerkerian-Le Goff

**Presynaptic plasticity in hippocampal circuits / Plasticité présynaptique
dans les circuits de l'hippocampe**

C. Mulle (Bordeaux)

Scientific Programme

Friday, 24. May 2019

PLENARY LECTURE / CONFÉRENCE PLÉNIÈRE
09:00 - 09:30

Auditorium

PL07, Frédéric Saudou

Chairs:

D. Blum (Lille)

Huntingtin: Linking fast axonal transport, energy supply and neurotrophin signaling to neurodegeneration / Huntingtine : transport axonal, métabolisme énergétique, signalisation neurotrophique et neurodégénérescence.

F. Saudou (Grenoble)

SPECIAL SESSION / SESSION SPÉCIALE
09:30 - 09:35

Auditorium

Presentation of Cité de l'Innovation et des Savoirs Aix-Marseille by Aix-Marseille Université

PLENARY LECTURE / CONFÉRENCE PLÉNIÈRE
09:35 - 10:05

Auditorium

PL08, Eve Marder

Chairs:

F. Chavane

Robustness to perturbation and degeneracy in neurons and circuits / Robustesse des neurones et des circuits aux perturbations et à la dégénérescence.

E. Marder (Waltham)

POSTER SESSION / COMMUNICATIONS AFFICHÉES
10:00 - 11:00

Foyer

P3, Poster session 3

Poster sessions run from 10:00 to 11:00 and from 13:00 to 17:30 every day. However, a one hour time block is dedicated to discussion with the authors:

- from 10:00 to 11:00 for even-numbered posters
- from 14:30 to 15:30 for odd-numbered poster

The following posters can be viewed today:

Development, synaptic plasticity

Scientific Programme

Role of Netrin-1 in the guidance of the corticospinal tract and the lateralization of motor control

M.-P. Morel (Paris)

Theta-burst firing induces a homeostatic depression of intrinsic excitability involving Kv1.1 channels in CA1 pyramidal neurons in vivo

P. Morgan (Marseille)

Functional dynamics of the infant brain

S. Naik (Paris)

Beyond the receptor: new strategies to study the dynamic interactions between the AMPAR and their auxiliary subunits

D. Neto (Bordeaux Cedex)

Deletion of CB1 receptors in D1-positive cells impairs object recognition memory and synaptic plasticity

J.F. Oliveira da Cruz (Bordeaux)

Exploring the role of FLNA in cortical development and function

G. Panti (Marseille)

Consuming a balanced diet from weaning reverses the inappropriate food preferences in offspring of low protein-diet fed rat dams but modifies the glutamatergic and dopaminergic circuits in hypothalamus and reward pathway

SYMPOSIUM
11:00 - 13:00

Auditorium

**S29, Organization and function of neuronal activity in the developing hippocampus.
/ Fonction et organisation de l'activité neuronale dans l'hippocampe immature.**

Chairs:

P.-P. Lenck-Santini (Marseille)

**The development of neural mechanisms for memory consolidation /
Développement des mécanismes neuronaux de la consolidation mnésique**

T.J. Wills (London)

**Calcium imaging investigation of neuronal activity in the neonatal hippocampus. /
Étude en imagerie calcique de l'activité neuronale dans l'hippocampe néonatal.**

M. Picardo (Marseille)

Scientific Programme

Physiological and pathological hippocampal network patterns in the postnatal period of mice. / Patrons physiologiques et pathologiques des réseaux hippocampiques lors de la période néonatale chez la souris.

D. Isbrandt (Köln)

Electrophysiological properties of the early network activity in neonatal rat hippocampus. / Propriétés électrophysiologiques de l'activité précoce des réseaux de l'hippocampe néonatal du rat.

G. Valeeva (Kazan)

How does an oxytocin treatment in early life impact social behavior and hippocampal alterations in Magel2-deficient mice?

A. Bertoni (Marseille)

SYMPOSIUM
11:00 - 13:00

Callelongue

S30, Learning and cognitive abilities during development: an integrative approach. / Apprentissage et efficacité cognitive durant le développement : une approche intégrative.

Chairs:

A. Cachia (Paris)

How does the early brain structural organization relate to functional development in infants? / Comment l'organisation anatomique précoce du cerveau est-elle liée au développement fonctionnel du bébé?

J. Dubois (Gif-sur-Yvette)

A brain-behavioral study of motor learning in typically-developing children and children with learning disorders. / Etude en imagerie comportementale de l'apprentissage moteur chez des enfants au développement typique ou souffrant de troubles des apprentissages.

C. Assaiante (Marseille)

Cognitive abilities and training efficiency, between early brain development and late neuroplasticity. / Capacités cognitives et efficacité de l'entraînement, entre développement cérébral précoce et neuroplasticité tardive.

A. Cachia (Paris)

Computational modeling of functional impairments observed in neurodevelopmental psychiatric disorders / Modélisation d'anomalies fonctionnelles observables lors de troubles psychiatriques neurodéveloppementaux

R. Jardri (Paris)

Inhibition of a response to a social stimulus: a developmental fMRI study

A. Afyouni (Marseille)

Scientific Programme

SYMPOSIUM
11:00 - 13:00

Endoume 1+2

S31, Lipids and brain function: from the synaptic membrane to psychiatric symptoms. / Lipides et fonction cérébrale : de la membrane synaptique aux symptômes psychiatriques.

Chairs:

C. Bosch-Bouju (Bordeaux)

Role of dietary omega 3 in mood and cognitive disorders in preclinical models. / Rôle des omega-3 nutritionnels dans les troubles cognitifs et de l'humeur chez la souris.

S. Laye (Bordeaux)

Positron emission tomography imaging of dopamine-lipid interactions in the human brain. / Tomographie par émission de positron des interactions cérébrales dopamine-lipides chez l'homme.

M. Willeit (Vienna)

Vulnerability of the nucleus accumbens neuronal network to developmental n-3 PUFA deficiency: consequences on the reward and motivation system

F. Ducrocq (Bordeaux)

Impact of lipid polyunsaturation on dopamine D2 receptor activation and signaling / Impact de l'insaturation lipidique sur l'activation et la signalisation du récepteur dopaminergique D2

I. Alves (Pessac)

Balancing membrane impermeability and flexibility by combining different acyl chains in phospholipids. / Equilibre entre imperméabilité et flexibilité de la membrane par la combinaison de différentes chaînes acyles dans les phospholipides.

B. Antonny (Valbonne)

SYMPOSIUM
11:00 - 13:00

Endoume 3

S32, Multiple signaling pathways linking chronic stress and glucocorticoids to neuropsychiatric disorders. / De multiples voies de signalisation relient stress chronique, glucocorticoïdes et désordres neuropsychiatriques. Supported by Enzo Life Sciences

Chairs:

M.-P. Moisan (Bordeaux)

F. Jeanneteau (Montpellier)

Brain corticosteroid receptor transcriptional activity regulation: mechanisms and targeting. / Régulation de l'activité transcriptionnelle des récepteurs centraux aux corticostéroïdes : mécanismes et cibles.

O.C. Meijer (Leiden)

Stress, brain mitochondria and psychiatric disorders / Stress, mitochondries neuronales et maladies psychiatriques

M. Arango-Lievano (Montpellier)

Scientific Programme

Mice selected for extremes in glucocorticoid stress reactivity: modelling clinically relevant endophenotypes of major depression. / Sélection génétique de souris avec une réactivité au stress extrême: modélisation d'endophénotypes de la dépression majeure pertinents cliniquement.

C. Touma (Osnabrueck)

Interplay of immune and glucocorticoid signaling pathways in the depressive symptoms of obese patients. / Interaction des voies de signalisation immune et glucocorticoïde dans les symptômes dépressifs de patients obèses.

M.-P. Moisan (Bordeaux)

Switching from PTSD-like to normal memory: the key role of hippocampal-amygdalar dendritic changes

E.-G. Ducourneau (Bordeaux)

SYMPOSIUM
11:00 - 13:00

Riou

S33, Theoretical Neuroscience III - Bridging scales toward clinical applications. / Neurosciences théoriques III - Théorie multi-échelle vers les applications cliniques. Supported by Aix-Marseille Université, Institut Carnot STAR and SATT Sud-Est

Chairs:

B. Gutkin (Paris)

S. Olmi (Sophia Antipolis)

Modelling ultra-slow oscillations in cortical circuits: role of interneuronal diversity and cholinergic pathology in schizophrenia and Alzheimers. / Modélisation des oscillations ultra-lentes corticales: la diversité interneuronale et la pathologie cholinergique dans la schizophrénie et l'Alzheimer.

B. Gutkin (Paris)

Mental illness as impairment of Bayesian inference. / La maladie mentale comme altération de l'inférence bayésienne.

P. Series (Edinburgh)

Large-scale network models and connectomics in clinical applications. / Modèles de réseaux à grande échelle et connectomics en applications cliniques.

V. Jirsa (Marseille)

A general mean-field approach to derive realistic population models from spiking neuron models / Une approche générale en champ moyen pour dériver des modèles réalistes de populations neuronales à partir de modèles de neurones à impulsions

A. Destexhe (Gif-sur-Yvette)

Modeling human surface potentials evoked by electrical stimulation: from microscopic to macroscopic scales

M. Dali (Gif-sur-Yvette)

Scientific Programme

SYMPOSIUM
11:00 - 13:00

Sormiou

S34, Oscillations in vision: from neuronal signals to behavior. / Rôle des oscillations en vision : des neurones au comportement.

Chairs:

S. Ben Hamed (Bron)

Visual cortex mechanisms subserving rhythmic neuronal activation and attentional sampling. / Mécanismes du cortex visuel sous-tendant l'activation neuronale rythmique et l'échantillonnage attentionnel.

M. Schmid (Newcastle upon Tyne)

Two modes of feedback in monkey visual cortex

T. van Kerkoerle (Paris)

The rhythms of attention and perception. / Les rythmes de l'attention et de la perception.

L. Dugué (Paris)

Prefrontal cortex attentional spotlight explores space rhythmically. / Le spotlight attentionnel préfrontal explore l'espace rythmiquement.

C. Gaillard (Bron)

SYMPOSIUM
11:00 - 13:00

Morgiou

S35, The emerging synaptic and metabolic roles of glial cells: sleep versus wakefulness, a SFRMS symposium. / Rôles synaptique et métabolique des cellules gliales: sommeil versus éveil, un symposium de la SFRMS.

Chairs:

L. Seugnet (Lyon)

Polyunsaturated fatty acids tune microglial shaping of neuronal circuits in the developing brain. Consequences for sleep/wake activity. / Les acides gras polyinsaturés contrôlent le développement des réseaux neuronaux microglie-dépendant. Conséquences pour l'éveil/sommeil.

A. Nadjjar (Bordeaux)

How does neuroglial Notch signaling impacts the vulnerability to sleep deprivation? / Comment la signalisation neurogliale Notch module-t-elle la vulnérabilité à la privation de sommeil?

L. Seugnet (Lyon)

Role of astroglial metabolic networks in the maintenance of wakefulness. / Rôle des réseaux astrocytaires métaboliques dans le maintien de l'éveil.

J. Clasadonte (Lille)

Sleep and wake at cortical synapses: a glial perspective. / Eveil/sommeil et synapses corticales: une perspective gliale.

M. Bellesi (Ancona)

Microglial motility during sleep and wakefulness. / Motilité gliale durant l'éveil et le sommeil.

I. Hristovska (Lyon)

Scientific Programme

POSTER SESSION / COMMUNICATIONS AFFICHÉES
13:00 - 17:30

Foyer

P3, Poster Session 3

Poster sessions run from 10:00 to 11:00 and from 13:00 to 17:30 every day. However, a one hour time block is dedicated to discussion with the authors:

- from 10:00 to 11:00 for even-numbered posters
- from 14:30 to 15:30 for odd-numbered poster

The following posters can be viewed today:

Development, synaptic plasticity

Role of Netrin-1 in the guidance of the corticospinal tract and the lateralization of motor control

M.-P. Morel (Paris)

Theta-burst firing induces a homeostatic depression of intrinsic excitability involving Kv1.1 channels in CA1 pyramidal neurons in vivo

P. Morgan (Marseille)

Functional dynamics of the infant brain

S. Naik (Paris)

Beyond the receptor: new strategies to study the dynamic interactions between the AMPAR and their auxiliary subunits

D. Neto (Bordeaux Cedex)

Deletion of CB1 receptors in D1-positive cells impairs object recognition memory and synaptic plasticity

J.F. Oliveira da Cruz (Bordeaux)

Exploring the role of FLNA in cortical development and function

G. Panti (Marseille)

Consuming a balanced diet from weaning reverses the inappropriate food preferences in offspring of low protein-diet fed rat dams but modifies the glutamatergic and dopaminergic circuits in hypothalamus and reward pathway

J. Paradis (Nantes)

Neuronal integration in the adult olfactory bulb is a non-selective addition process

J.-C. Platel (Marseille)

The Punctin-Neuroigin partnership regulates the C. elegans inhibitory synapse; investigating the synaptic interactions of Punctin

S. Platsaki (Marseille)

Impact of a Fragile X syndrome missense mutation on the neuronal function

M. Prieto (Valbonne)

Glutamate imaging reveals co-operative release sites in the CA3 giant mossy fiber boutons

S. Rama (London)

Death of Cajal-Retzius cells is required for developmental pruning of synapses and for the maturation of cortical circuits

M. Riva (Paris)

Scientific Programme

Studying neuronal network genesis to understand neurodegenerative diseases: role of VPS35, a sub-unity of the retromer

M. Roque (Marseille)

Disruption of the transcription factor NEUROD2 causes a spectrum of neurobehavioral phenotypes in mice and humans

K. Runge (Marseille)

Long-term plasticity of intrinsic excitability in dorsal lateral geniculate nucleus

M. Russier (Marseille)

Dopamine triggers Long Term Potentiation

F. Sayegh (Toulouse)

Study of the etiology of a rare form of mental retardation linked to autism, associated with mutations in the TRIO gene

S. Schmidt (Montpellier)

Fast unsupervised generation of oriented vascular graphs

S. Skriabine (Paris)

A primary cilium-dependent cAMP-rich zone at the centrosome is necessary for proper saltatory neuronal migration in the postnatal mouse brain

J. Stoufflet (Paris)

Morphological and electrophysiological characterization of CSPNs in a mouse model of fine motor skill impairments

C. Tocco (Nice)

The lack of spatacsin (SPG11) disrupts postnatal synaptogenesis in mouse

L. Toupenet (Paris)

Genetic and environmental factors shape the brain development

R. Verhaeghe (Villeneuve d'Ascq)

SPECIAL SYMPOSIUM / SYMPOSIUM SPÉCIALISÉ
13:15 - 14:45

Callelongue

SP06, How to succeed in academic research / Faire carrière dans un organisme public de recherche

The presentations will be given by the Presidents of Neuroscience CNRS committee (Section 25 and Section 26), INSERM committee (section EE9), CNU 69 in a roundtable format, around the following questions:

- The role of the French Research (CNRS/INSERM) and University Institutes.
- What are the criteria to get an academic position in these Institutes?
- What is the typical profile of training?
- How to get promoted when you have an academic position?

The four invited Presidents are:

- Valérie Crépel (Marseille)- President of INSERM CsS "Neuroscience"
- Pascal Barone (Toulouse)- President of CoNRS section 26 "Cerveau, cognition, comportement"
- Philippe Faure (Paris)- President of CoNRS commission 25 " Neurobiologie moléculaire et cellulaire, neurophysiologie" du CoNRS
- Alain Trembleau (Paris)- President of section 69 Neurosciences du Conseil National des Universités (CNU)

Chairs:

V. Crepel (Marseille)
P. Barone (Toulouse)

SPECIAL SYMPOSIUM / SYMPOSIUM SPÉCIALISÉ
13:15 - 14:45

Endoume 1+2

SP07, Neurosciences in the Mediterranean basin in Antiquity and the Middle Ages. / Les neurosciences dans le bassin méditerranéen dans l'Antiquité et le Moyen-âge.

Chairs:

F. Clarac (Marseille)

On the discovery of the brain in Greco-roman Antiquity. / La découverte du cerveau dans l'antiquité gréco-romaine.

A. Debru (Paris)

Memory and Imagination in Arabic and Latin Medieval Tradition. / Mémoire et imagination au Moyen-âge dans la tradition arabe et latine.

J. Chandelier (Paris)

Head and brain diseases': the point of view of some medieval physicians. / La tête et les maladies du cerveau : le point de vue de quelques médecins médiévaux.

M. Katouzian-Safadi (Paris)

From texts to bones: theories and practices of cranial surgery in the Middle Ages. / Des textes aux ossements : théories et pratiques de la chirurgie crânienne au Moyen-Âge.

S. Bédécarrats (Tours)

Scientific Programme

SYMPOSIUM
15:30 - 17:30

Auditorium

S36, Neuronal networks linking emotions and sensory integration. / Réseaux neuronaux liant émotions et intégration sensorielle.

Chairs:

F. Gambino (Bordeaux)
P. Fossat (Bordeaux)

Organization of valence coding in neural populations of the amygdala and insular cortex / Organisation de la valence dans les populations neuronales de l'amygdale et du cortex insulaire

A. Beyeler (Bordeaux)

Contribution of low voltage activated calcium channel and insular cortex to tactile experience integration / Contribution des canaux calciques à bas seuil et du cortex insulaire dans l'intégration de l'expérience sensorielle tactile

A. François (Montpellier)

Central networks involving 5HT neurons of the raphe nucleus in the control of spinal nociceptive transmission / Réseaux nerveux centraux impliquant les neurones à sérotonine du raphe magnus dans le contrôle de la transmission nociceptive spinale

P. Fossat (Bordeaux)

Neural integration of threat and territoriality in the hypothalamus / Intégration neuronale de la menace et de la territorialité dans l'hypothalamus

C. Gross (Monterotondo)

A hippocampus-accumbens tripartite neuronal motif guides appetitive memory in space

S. Trouche (Oxford)

SYMPOSIUM
15:30 - 17:30

Callelongue

S37, Neuroinflammation in Alzheimer's disease: emerging aspects and clinical implications, a NeuroImmunology Club symposium. / La neuroinflammation dans la maladie d'Alzheimer : aspects émergents et implications cliniques, un symposium du Club Français de Neuro-Immunologie.
