Dear Colleague,

this year, the Euro Fed Lipid Congress will take place in Montpellier. This beautiful city in the southern part of France, just a short distance from the Mediterranean sea, has a strong scientific community gathering internationally recognized research centres (CNRS, INRA, INSERM, CIRAD, Agropolis, SupAgro, Montpellier University,...) and around 12,000 researchers. Main research topics are medicine, agronomy, chemistry, pharmacology, environment, water, and there is a local interest for lipids in all these areas. Montpellier is therefore the right place for a meeting covering "Oils, Fats and Lipids: From Lipidomics to Industrial Innovation".

One particularity of this congress is that it is co-hosted by two French national societies, both being members of Euro Fed Lipid. The first one, SFEL (Société Française d'Etude des Lipides; ex AFECG; www.sfel.asso.fr/) is the oldest one and was created in 1943. Covering various aspects of lipid science and technology, SFEL has strong links with the oil and fat industry. The second one, GERLI (Groupe d'Etude et de Recherche en Lipidomique; www.gerli.com/) is the lipid division of the French Society for Biochemistry and Molecular Biology (SFBBM) and it was created in 1978 as an independent association. It also covers various aspects of lipid research with a strong connection to life sciences. Together with session chairs, our members have been involved in the selection of oral (around 350 requests) and poster presentations from submitted abstracts, as well as in contacting internationally recognized scientists for plenary and keynote lectures. At the end, we are convinced that the final programme established by the scientific committee is providing a broad and comprehensive view on current lipid science and technology. We hope it will be attractive for other European societies and colleagues from all

over the world. We hope it triggers new contacts and helps to develop new collaborations among academic scientists and those from industry.

We are delighted to invite you to Montpellier and look forward to welcoming you at the 12th Euro Fed Lipid Congress from 14-17 September 2014. It will taking place at "Le Corum", a conference centre located right in the heart of Montpellier historical centre, at a walking distance from Place de la Comédie. You will thus have a unique opportunity to discover the History and Heritage of Montpellier besides the scientific sessions prepared for you.

Welcome at the 12th Euro Fed Lipid Congress!

We look forward to meeting you there.

» WELCOME TO MONTPELLIER

Capital of the Languedoc-Roussillon region, just 11 km from the Mediterranean Sea, Montpellier is the eighth largest town in France, regularly ranked top in terms of quality of life.

A unique example of intelligent city planning in Europe, built by the world's leading architects, Montpellier is a destination that is also rich with 1,000 years of history.

Renowned for its dynamism and for its university faculties (including the first Faculty of Medicine in the western world), the capital of Languedoc-Roussillon is one of the leading university towns in France and one of southern Europe's main business centres. As a result of Montpellier's long university tradition, nearly 70,000 students reside in the immediate area. Due to this youthful influence, or rather thanks to it, there is an abundance of festivals, cafés and other encounters just waiting to happen.

Walking through Montpellier's historical centre is like travelling through 1,000 years in time, from the year 985 to the seeds of the city's future. The city of Montpellier has kept the reminders of its past intact and proudly protects the symbols of every era. Meander along the typical medieval streets of the south, winding your way from the central Place de la Comédie to the peaceful Place de la Canourgue.

Montpellier is located in the middle of the Coteaux du Languedoc area, the largest wine-growing region in the world. Montpellier is unique in that it is the French city with the most area covered by vineyards in its territory. Launched in 2003, the Grés de Montpellier appellation encompasses the know-how of local producers and the quality the Montpellier land.
