HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Applications of DNA barcoding to plant protection and biodiversity studies

INRA, UR633 Zoologie Forestière, F-45075 Orléans, France

Résumé de la présentation : (Arial, 12 points – interligne 1,5)

DNA Barcoding – the use of short, standardized DNA sequences for species identification – is revolutionizing the way we study biodiversity. Here we give an overview of DNA barcode technology and illustrate its successful application in the fields of plant protection, large-scale biomonitoring and rapid biodiversity assessment

Thème : Biodiversité (Arial, 12 points)

Mots clés : Bioassessment, Insects, Molecular diagnostics, Plants pests, Rapid biodiversity assessment, species identification
