## Pratiques d'auto-valorisation ?

- Présentation au journées du LAMETA :  
Visibilité sur Internet de l'UMR LAMETA :  
stratégies et pratiques des chercheurs
- Cette étude a nourri la réflexion que nous  
avons menés sur le projet Mendeley

# Auto-valorisation : les pratiques

# En conclusion

- Un recensement de la totalité des publications de l'UMR impossible via Prodnra
- Une base de données en locale qui permet le recensement et l'affichage sur le net des publications de l'UMR
- Des pratiques d'auto-valorisation hétérogènes
- Très peu de présence sur les réseaux sociaux de recherche
- Un soucis d'être reconnu par sa communauté : archives ouvertes REPEC

# Mendeleïev : principes et spécificités 2.0

## Principes : logiciel bibliographique

- Collecter et gérer les références bibliographiques
  - des documents nécessaires pour la rédaction de bibliographies
  - de ses **propres travaux**, pour les valoriser.
- Automatisation
  - de la collecte et de la saisie des références collecter sur Internet ([Sc direct](#), [Springer](#), [Web of Science](#), [Econlit](#), [Repec](#), [Google Scholar](#)),
  - du rapatriement et de la saisie des pdf localisés sur votre ordinateur
  - de la mise à jour de vos publications sur la web
  - de la rédaction de vos bibliographies (Word, Open Office, LaTeX, Lyx,...)

## Principes : 2.0 & réseau sociaux

- Logiciel téléchargeable gratuitement mais non libre (propriétaire).
- Double interface : données sur son poste et dans le « Cloud »
- Web & réseau : Gérer et partager les références bibliographiques, afficher ses travaux, se regrouper par affinité

### Abstract

Assuming that a North-South transfer is the key to effective climate cooperation, we ask when and how much the North should offer to the South in return for a commitment to reduce deforestation and forest degradation. In light of the risk of irreversible damage over time, we examine a negotiation with a deadline. In this case, the North threatens the South over a negotiation deadline in case an agreement is not reached rapidly. We assess the conditions for an agreement to be immediate or delayed, and discuss those situations likely to result in negotiation failure. Despite the risk of irreversible damage over time, we show that cooperation is likely to be delayed and we identify situations wherein the North and South do not reach an agreement within the deadline. Although Pareto-improving, cooperation may collapse because of inefficiencies related to incomplete information. What's more, we show that in negotiations with a deadline, uncertainty about the benefits deriving from cooperation and the irreversibility of the damage that will be caused if cooperation is delayed are the two key components affecting choice. 2011 Springer Science+Business Media, LLC.
