HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Corrigendum: FANCM Limits Meiotic Crossovers in Brassica Crops

A Corrigendum on

FANCM Limits Meiotic Crossovers in Brassica Crops

by Blary, A., Gonzalo, A., Eber, F., Bérard, A., Bergès, H., Bessoltane, N., et al. (2018). *Front. Plant Sci.* 9:368. doi: 10.3389/fpls.2018.00368

We have noticed an error in the description of the mutation we used for BraA.FANCM.

In the original article, we stated that the mutation we retained for this gene (referred as to *braA.fancm-1*) consisted of a substitution of a proline at position 443 for a leucine. This was a mistake. In fact, *braA.fancm-1* consisted of a substitution of a glycine at position 497 for an aspartic acid. We have updated Supplementary Figure 5 accordingly.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
