

Liste des ouvrages et sites web utilisés pour l'élaboration de la liste floristique de l'outil de comptage : PHYTOBS

List of books and websites used to develop floristic list of the counting tool: PHYTOBS

Cette liste ne constitue pas une bibliographie exhaustive sur le phytoplancton, mais présente les documents utilisés pour l'élaboration de la liste taxinomique, de la synonymie, du calcul des biovolumes et de la classification du phytoplancton servant dans l'outil de comptage : PHYTOBS.

Des sites internet très documentés sont aussi inclus dans cette liste.

Les **références de base**, à considérer comme nécessaires à une application en routine pour la détermination du phytoplancton, sont indiquées par des **astérisques** : un astérisque recommandé, 2 incontournable.

This list is not an exhaustive bibliography on phytoplankton, but it presents documents used to develop the taxonomic list, synonymy, biovolume calculations and classification of phytoplankton used in counting tool: PHYTOBS.

Well documented websites are also included in this list.

Basic references, regarded as necessary for a routine application for phytoplankton determination, are indicated by **asterisks**: one recommended, 2 compulsory.

Limitations

La classification retenue dans PHYTOBS résulte d'un choix réalisée au préalable, en effet différentes classifications sont actuellement en vigueur voir pour cela le site (Taxonomicon¹). PHYTOBS est un compromis d'opinions taxinomiques et peut ne pas refléter vos conclusions personnelles. C'est aussi un travail en constante évolution dont certaines données sont incomplètes. L'outil doit alors être considéré comme une aide à votre travail et non comme une version définitive.

The classification used in PHYTOBS result of a choice made previously. Indeed different classifications are current. View for this the website (Taxonomicon¹). PHYTOBS is a compromise of taxonomic opinions and may not reflect your personal conclusions. It is also a changing labor which some data are incomplete. The tool should then be considered as an aid to your work and not as a final version.
