

# CHO-Gb3

**Supplementary Figure S4: Dose-response curves of Stx2-positive microvesicles and free Stx2.** CHO-Gb3 cells were treated with increasing concentrations of Stx2-positive microvesicles (Stx2-pos MVs, n=5) and free Stx2 (n=3). The  $IC_{50}$  value of Stx2-pos MVs was 0.088 ng/mL and the  $IC_{50}$  value of free Stx2 was 0.11 ng/mL. Median and range are denoted. Two independent experiments are presented.
