HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Let's keep the world INTAQT?

The INTAQT project is a **five-year European Horizon 2020 project** that aims to assess the relationships between **animal production systems** and their **product quality**, in the poultry, dairy and beef sectors.

Our goal?

To develop **comprehensive models** and **tools** that allow to achieve consistently and verifiable **excellent quality, safe, healthy** and tasty animal-based products from both extensive and intensive husbandry systems.

Our Methodology?

Is all about combining the **high quality of animal products** to the **sustainability of production**. This concept, named "One Quality", allows to **reward farmers** and other operators in the agri-food chain who already transitioned to sustainable husbandry practices.

Join INTAQT and make a true impact!
