HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Protection of Geographical Indications in Trade Agreements: is it worth it?

European GIs in trade agreements

- Long time contentious issue in European trade relationships (WTO DSB in 1999 with the US, in 2003 with Canada...)
- Promoted by the European Union in multilateral and bilateral negotiations
- List of GIs included in recent EU trade agreements
 - EU-Korea (2012), EU-South Africa (2017), EU-Canada (2018), EU-Japan (2019)...

European GIs in trade agreements

This paper

- Investigates the impact of the inclusion of lists of GIs in European RTA on trade patterns
 - at the extensive margin (probability of export)
 - at the intensive margin (value)
 - on unit value (proxy for prices)
- Uses an original and exhaustive dataset of French agri-food firms data concerned by geographical indications
- Shows that protection of GIs in RTA has a positive impact on trade

Previous work

- *Duvaleix, Emlinger, Gaigné et Latouche 2021* on the French cheese industry
 - Price and quality effect of GI on exports
 - Higher market access to European markets and to countries with a similar policy about geographical indications
 - No volume effect

Data sources

- **INAO** dataset : authorized plants for a given GI product 2012-2019
- **French customs dataset** : export in value and quality, by firm, destination and NC8 product
- **FARE Dataset** from INSEE : characteristics by firm and year (size, productivity)
- list of GIs products included in RTA

Correspondance issues

1 Correspondence **GI products** \Rightarrow **NC8 codes**

- A GI product may correspond to several NC8
- A NC8 may correspond both to GI and non-GI product
 - \Rightarrow All exports of a authorized firm of a NC8 code concerned by a GI are considered labelled in our dataset
 - \Rightarrow GI firms may export both labelled and non-labelled products

2 Correspondence **plant** (SIRET) \Rightarrow **firms** (SIREN)

Descriptive statistics

- 225 French **Geographical Indications** (99 AOP and 126 IGP)
- 313 **NC8 codes** (over a total of 2,313), mainly in the dairy and meat sectors
- 337 **authorized firms** (over 5,046)
- GIs exported to 160 **destinations** (over 226)
- 25 countries have RTAs with the EU which include **lists of GIs**

Specification

$$Exp_{fjkt} = \alpha GI_{fkt} + \beta GI_{fkt} \times Agreement_{jkt} + \Pi_{ft} + \xi_{jkt} + \varepsilon_{fjkt}$$

- GI_{ft} is a dummy indicating whether firm f is authorized to handle GIs for k in t
- $Agreement_{jkt}$ is a dummy indicating whether country j recognizes a GI for product k in t
- Π_{ft} time variant firm characteristics (productivity) or fixed effects
- ξ_{jkt} fixed effects controls for characteristics of the market of country j and good k the year t
- $Exp_{fjkt} =$
 - lv_{fjkt} log of export values of f to j for the k at t
 - X_{fjkt} dummy=0 if f exports k to j at t
 - luv_{fjkt} log of export unit values of f to j for the k at t

Conclusion

- We show that :
 - GIs foster exports of French agri-food firms
 - the recognition of GIs in trade agreements increases both the intensive and extensive margins of trade, as well as unit values for these products
 - this outcome is mainly driven by AOP, the oldest and most renowned geographical indication

→ In favor of the inclusion of lists of GIs in trade agreements

Future steps

- Investigate whether the inclusion of GIs in RTA increases the perceived quality of products (Khandelwal 2013)
- Look at potential spillover effects for the other products of the authorized firms
- Explore the heterogeneity by sector and by country
