HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

✓ *Staphylococcus aureus*

➤ Human opportunist pathogen

Diseases caused by *Staphylococcus aureus*
Salgado-Pabón W and Schlievert P., 2014

➤ Significant impact on the veterinary medicine and food fields → Etiological agent of mastitis

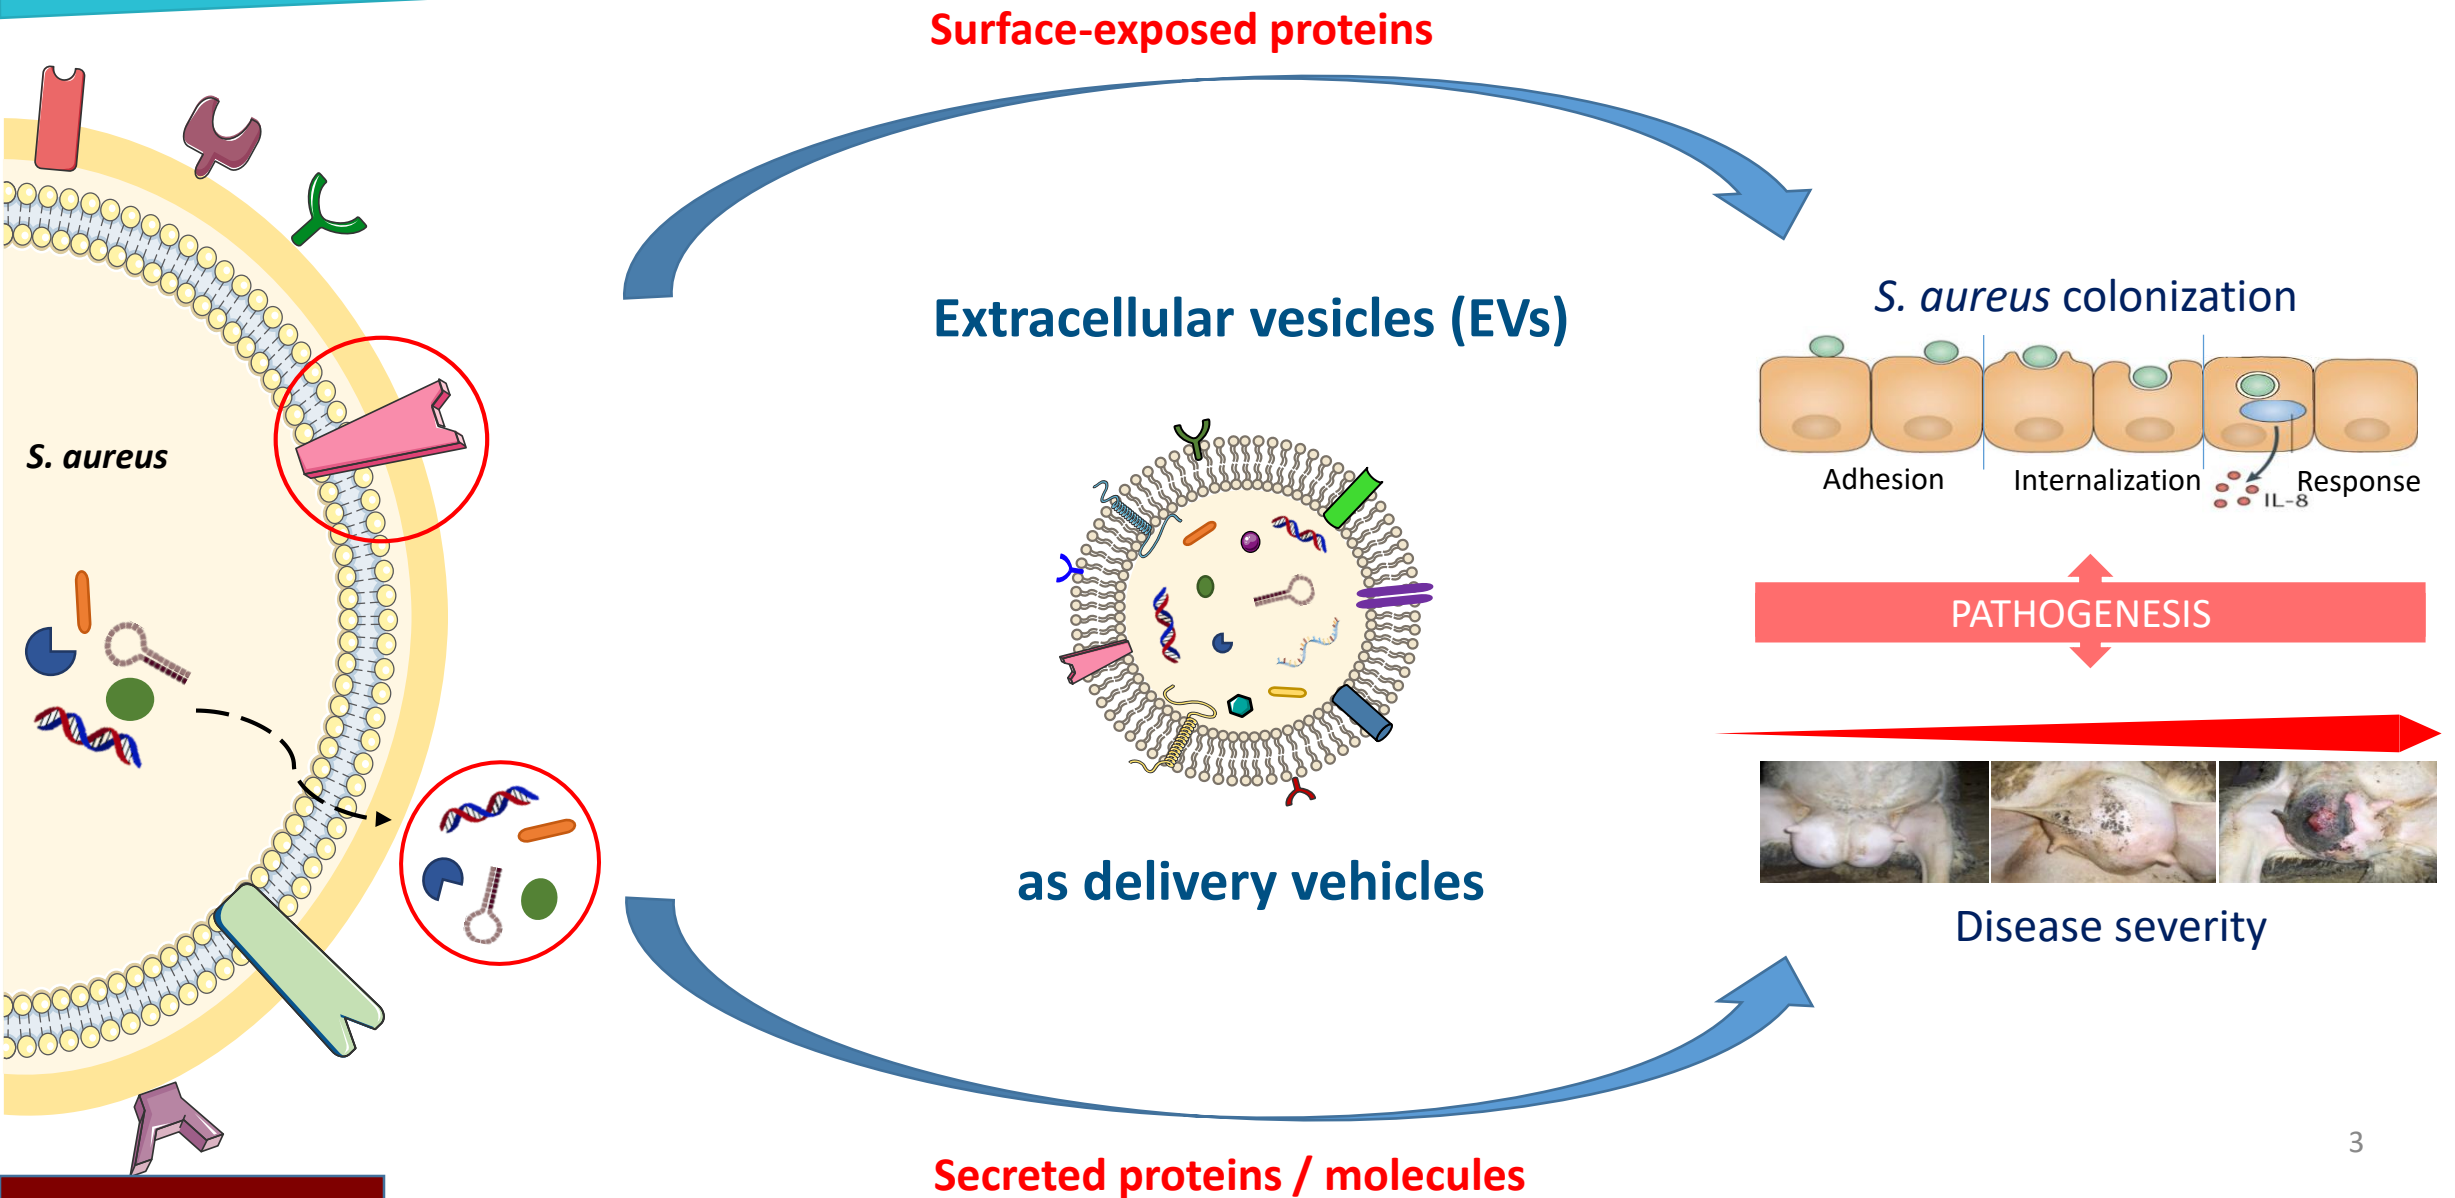

➤ The six highly virulent and antibiotic resistant bacterial pathogens

ESKAPE

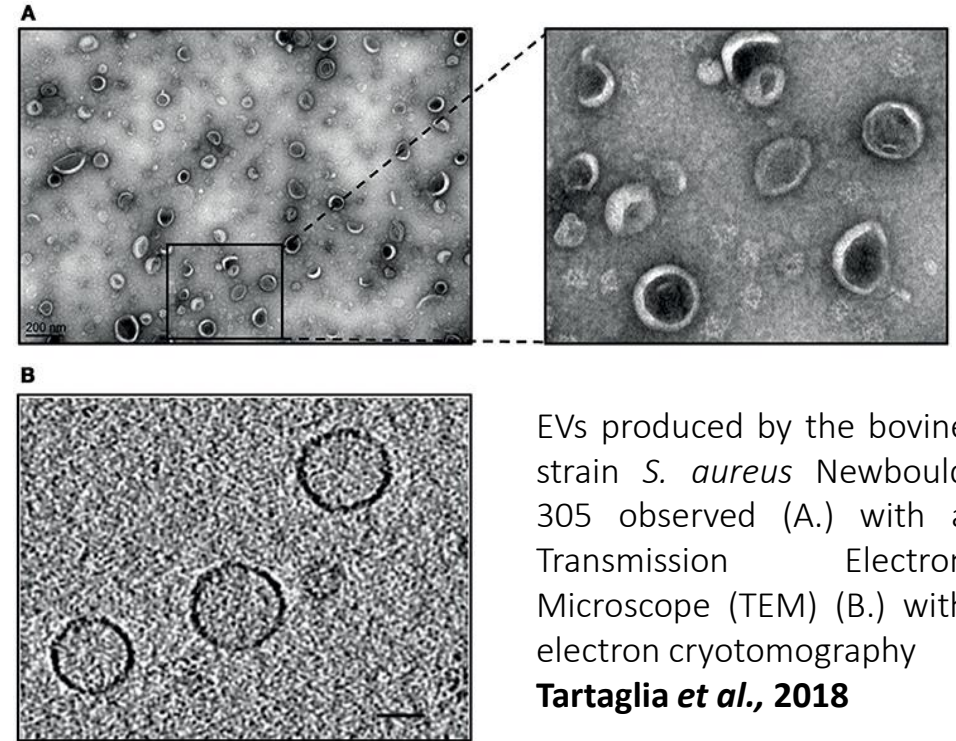

✓ *Staphylococcus aureus* virulence factors

✓ Extracellular vesicles (EVs)

- Lipid bilayer spherical nano-sized particles (30-300 nm) which carry various molecules (eg, lipids, nucleic acids, proteins)
- Vehicles that transport and deliver molecules to local or distant cellular targets
- Imply in cell-to-cell communication and especially in host-pathogen interaction

What is the contribution of extracellular vesicles from *S. aureus* in pathogenesis ?

✓ Role of extracellular vesicles in pathogenesis

Impact of EVs on the expression of several inflammatory genes

- Human osteoblast-like non-phagocytic cell line
- Taken from patient with osteosarcoma

✓ Role of extracellular vesicles in pathogenesis

Impact of EVs on the expression of several inflammatory genes

Increased expression of genes coding for :

✓ Cytokines

✓ Toll-Like Receptors (TLR)

→ N315-derived EVs induce the expression of various *TLR* and immune genes in MG-63 cells

✓ Role of extracellular vesicles in pathogenesis

Impact of EVs on the expression of several inflammatory genes

Abbas et al Cell Mol Imm 2015 Elsevier

➔ N315-derived EVs induce the expression of various *TLR* and immune genes in MG-63 cells

✓ Role of extracellular vesicles in pathogenesis

Impact of EVs on the expression of several inflammatory genes

How do these EVs interact with host cells?
Do EVs trigger both extracellular and intracellular pathway ?

→ N315-derived EVs induce the expression of various *TLR* and immune genes in MG-63 cells

✓ Internalization of EVs by MG-63 cells

+ EVs at 3 h of incubation

+ EVs at 17 h of incubation

Unpublished results

→ *S. aureus* N315-derived EVs are internalized by MG-63 cells

- in a dose-dependent manner
- in a time-dependent manner

✓ Internalization of EVs by MG-63 cells

Corbeil et al., 2020

→ Several different pathways of internalization are possible

Dil-labelled Extracellular vesicles
from N315 strain

✓ Internalization of EVs by MG-63 cells

Unpublished results

→ Internalization of N315 EVs can depend upon dynamin-mediated endocytosis and macropinocytosis

✓ Internalization of EVs by MG-63 cells

Unpublished results

→ Internalization of N315 EVs can depend upon dynamin-mediated endocytosis and macropinocytosis

Dil-labelled Extracellular vesicles from N315 strain

✓ Modulation of genes expression

→ The induced expression mediated by EVs of *TLR7*, *IFNβ* and *IL-6* genes is dependent on the internalization of EVs

→ Several pathways can be used by EVs to interact with host cells

✓ Modulation of genes expression

→ The induced expression mediated by EVs of *TLR7*, *IFNβ* and *IL-6* genes is dependent on the internalization of EVs

→ Several pathways can be used by EVs to interact with host cells

✓ To sum up

- N315-derived EVs can trigger both extracellular and intracellular signaling pathway in host cells
- Several EV components (proteins, RNA) can be involved in the interaction with host cells

✓ To sum up

Lipoproteins

Luz and al., 2022

Luz and al., 2021

- N315-derived EVs can trigger both extracellular and intracellular signaling pathway in host cells
- Several EV components (proteins, RNA) can be involved in the interaction with host cells
