**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

12 Table 1. Summary of the reviewed fertilization trials including crop name and botanical family, reported responses to N, P  
13 and NxP inputs, the type of crop response pattern (LM/MLH) and colimitation type we found for each case, as well as the  
14 reference of the associated article.

15 Table 2. Overview of the main soil-crop models handling N and P cycles in (agro-)ecosystems with the related key  
16 simulated processes. R and NR stand respectively for “Represented” and “Not Represented”.
