HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

No borders when driving agricultural economy!

An analysis of cross-border grain flows in Lorraine

Disruptive borderlands. Unpacking the innovative potential of transbordering practices, imaginaries and policies

4-6 Sep 2024 Esch-sur-Alzette (Luxembourg)

Introduction

- Agricultural geography, borders and grain sector
- TRANSAAT research-project
- Methodology

1. An intermediary zone producing cereals

- An agricultural and agro-industrial area
- A cereal front feeding cross-border flows

2. A double cross-border sales strategy

- Major outlets with cross-border companies
- A strategy structured around the port of Metz and the Moselle canal

3. A production basin at the center of modernization and agro-industrial concentration

- Increased dependency due to the closure of mills in Lorraine
- Threats to the cross-border logic

Discussion/conclusion

Cross-border situation: an obstacle to the agri-food transition ?

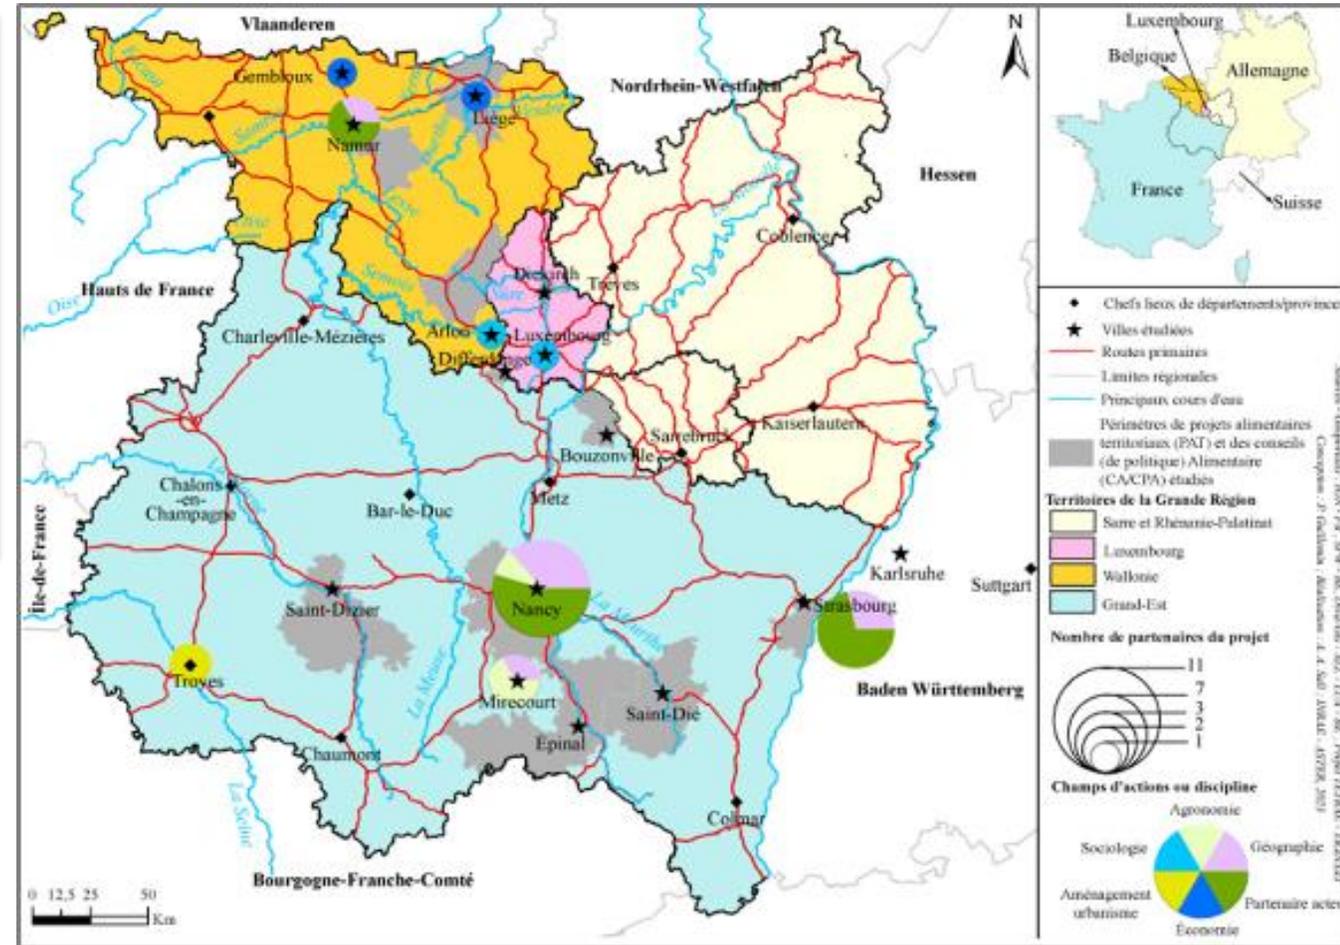

Agricultural geography, borders and grain sector

- The **grain market**, especially the wheat market, is fully integrated in the globalization of agricultural trade (Denieulle, 2023), and **France is the world's fourth-largest exporter of grains** (Beauvais et al., 2022)
- In agricultural geography, transborder situation is seen as a driver of spatial organisation: it allows **agro-industrial cross border strategies** (Lescureux et Margetic ; 1998, Rouget, 2008)
- Agricultural production systems are also dependent on demand from other countries
- Few studies, **intersects border studies with agri-food issues**, from a regional perspective
- Despite the cross-border nature of Lorraine – Haute-Marne, the agriculture of the region **has been little studied in cross-border terms**
- In particular, the **structure of the grain basin** has not been analyzed

TRANSAAT research-project

- In this context, TRANSAAT research-project **jointly examines agri-food and cross-border issues** at the scale of the Great Region
- Based on the hypothesis of **cross-border cooperation as an operational lever for the territorial anchoring of agri-food systems**, TRANSAAT is structured in three components.
- The second component is dedicated to the analysis of agri-food flows at different scales, to help **characterize the organization of the supply chains** and provide insights for adapting public policies to strategies that often **go beyond local action perimeters**

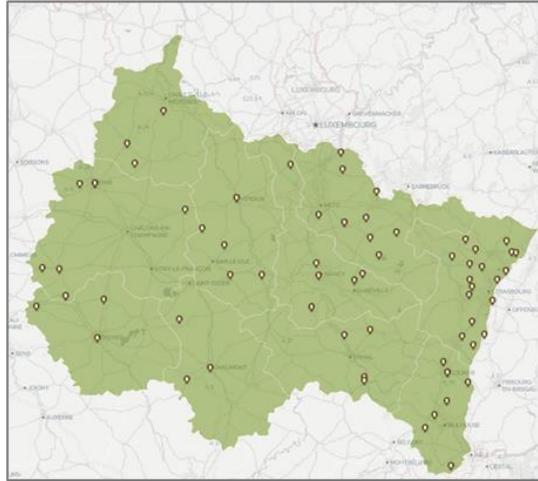

Transition en Territoires de l'Agriculture,
l'Alimentation et l'Environnement

Identification of grain collectors

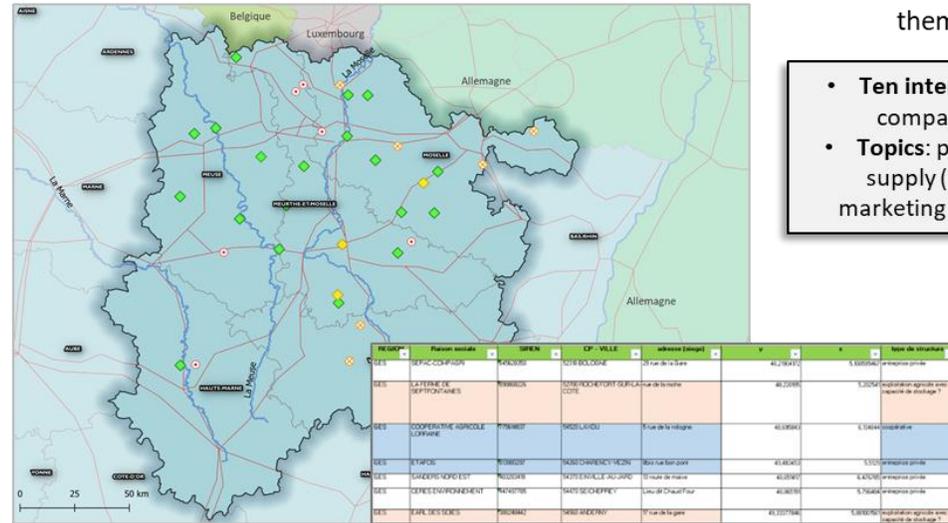

①

FranceAgriMer database:
certification of grain collectors

②

Data extraction and verification

④

Interview grid, recording and thematic transcription

- **Ten interviews** : cooperative, trading company, farms with certification
- **Topics**: presentation of the company, supply (volume, crops, basin, label), marketing (volumes, customers), logistics

Analysis of sales strategies

An agricultural and agro-industrial area

Soft wheat yield 2023

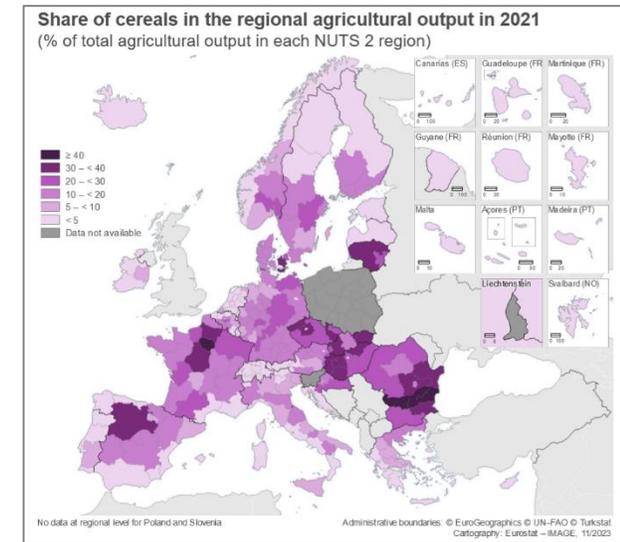

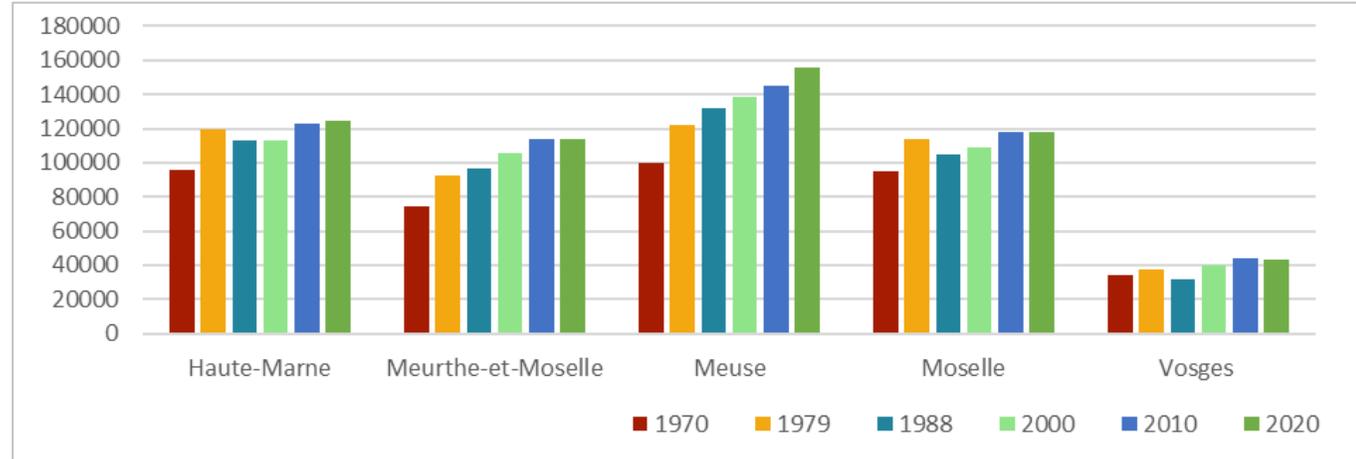

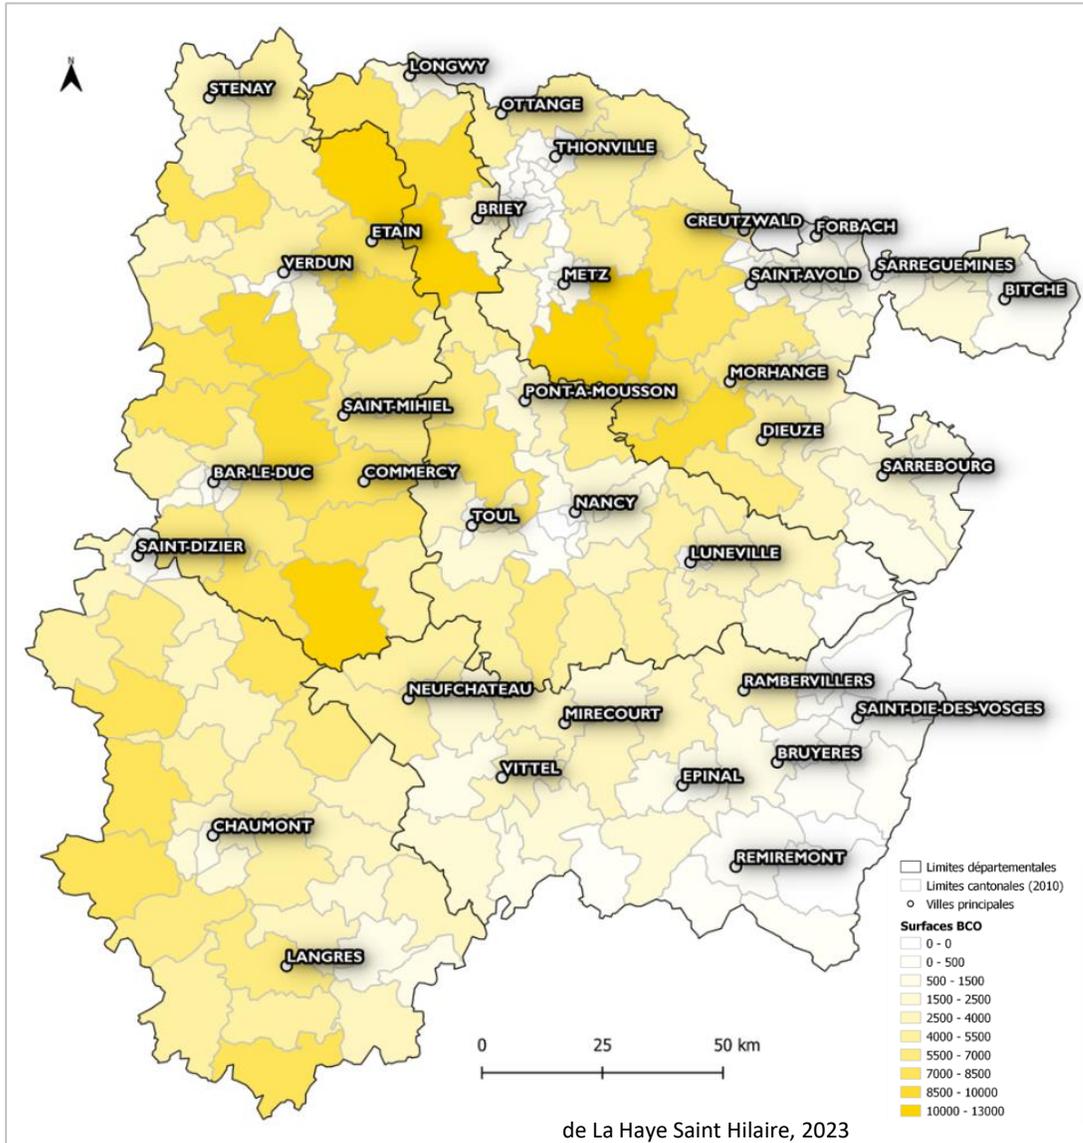

- **Restrictive soil criteria**
- **Lower yields than other agricultural zones**
- larger farms and lower incomes per hectare
- **Shorter and simpler crop rotation**
- High dependence on CAP aid
- Weak presence of agro-industrial operators

A partir de : Pierre, 2004 ; Chaire « Agricultures en zones intermédiaires », Institut Agro Dijon, 2017

An intermediary zone producing cereals

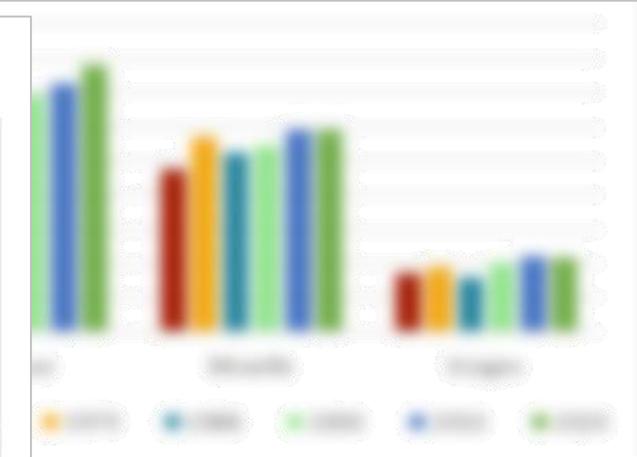

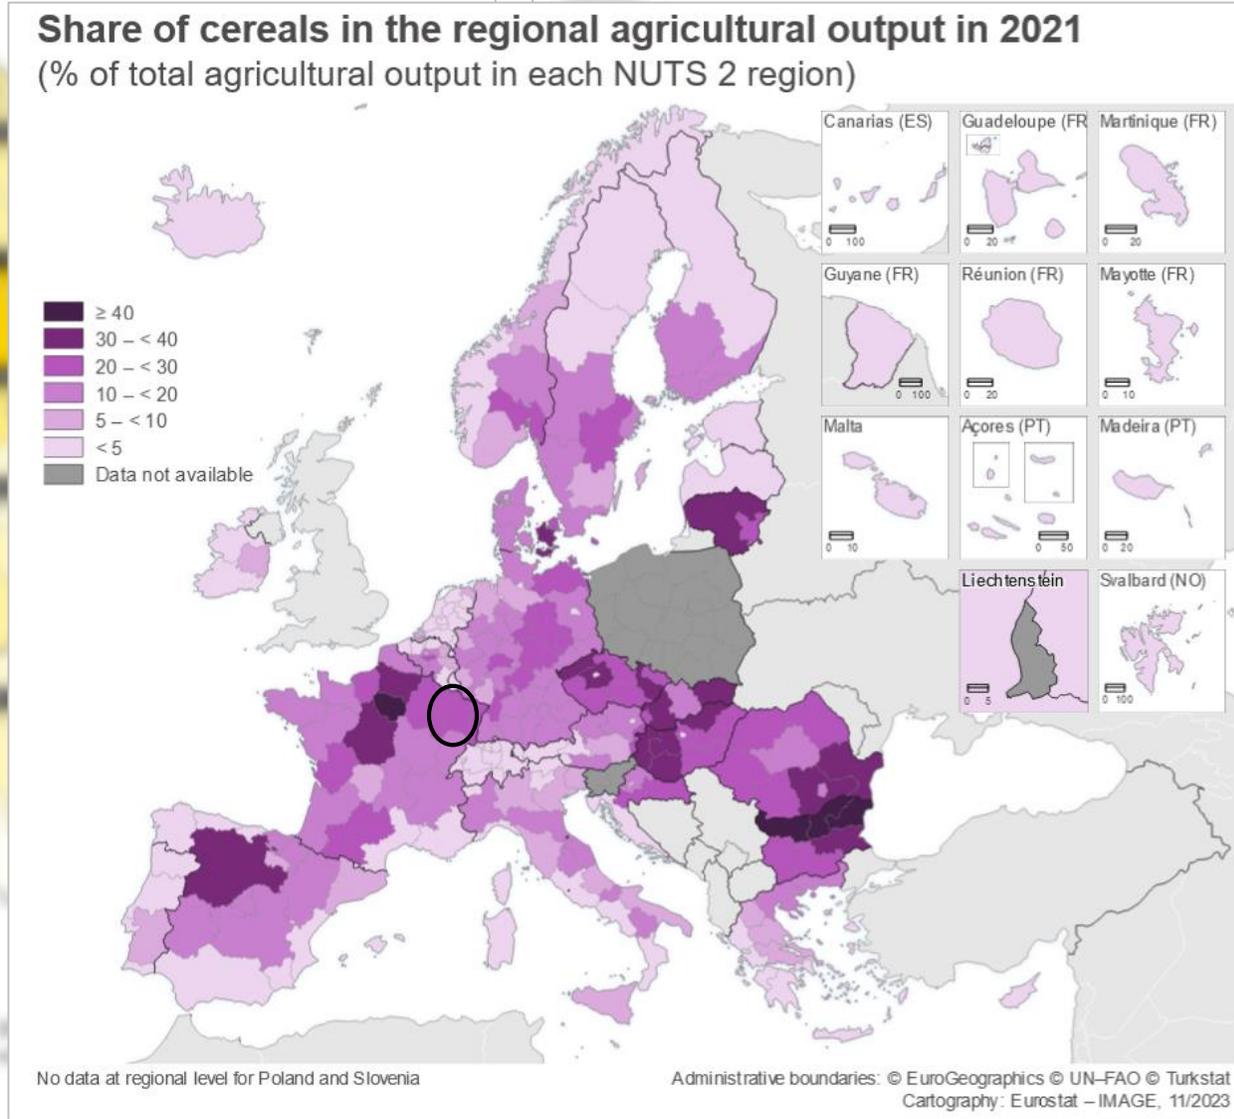

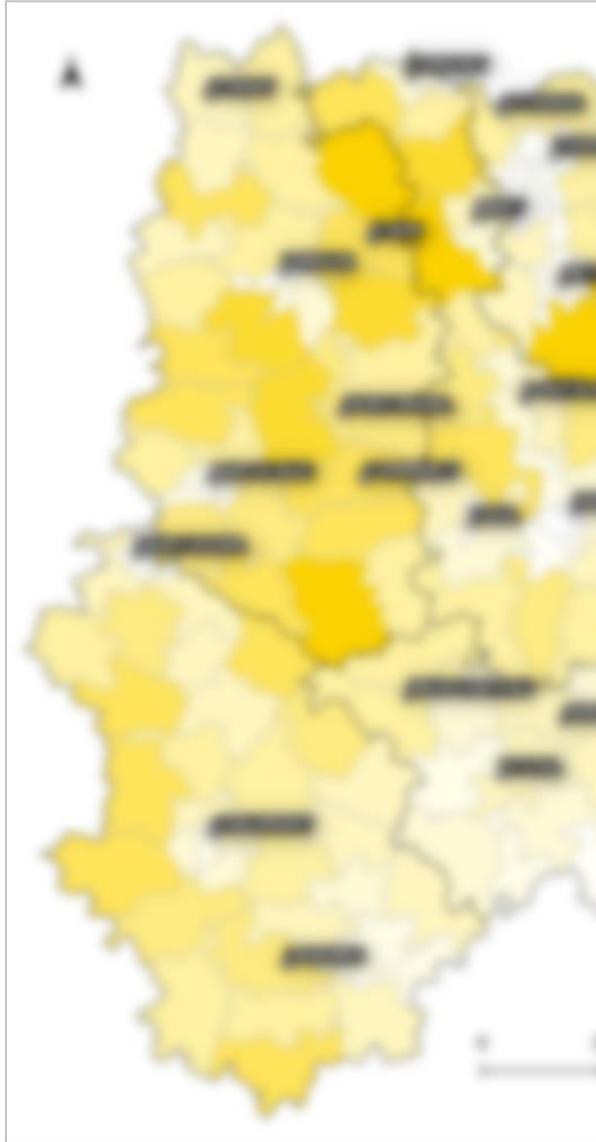

A cereal front feeding cross-border flows

<https://ec.europa.eu/eurostat/fr/web/products-eurostat-news/w/ddn-20231130-1>

An intermediary zone producing cereals

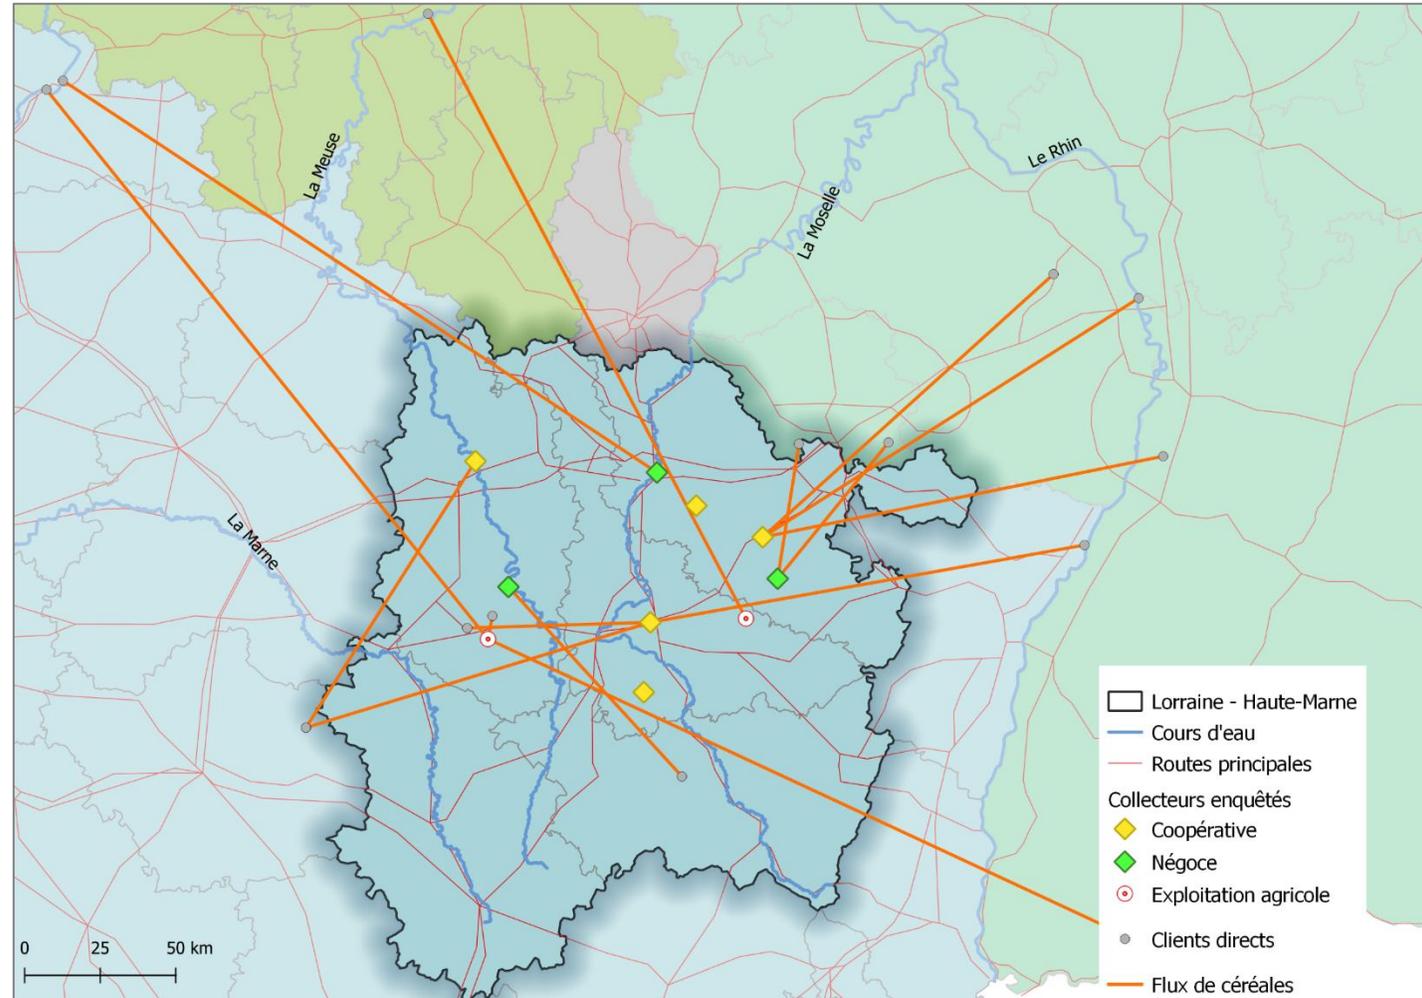

A cereal front feeding cross-border flows

A double cross-border sales strategy

Major outlets with cross-border companies

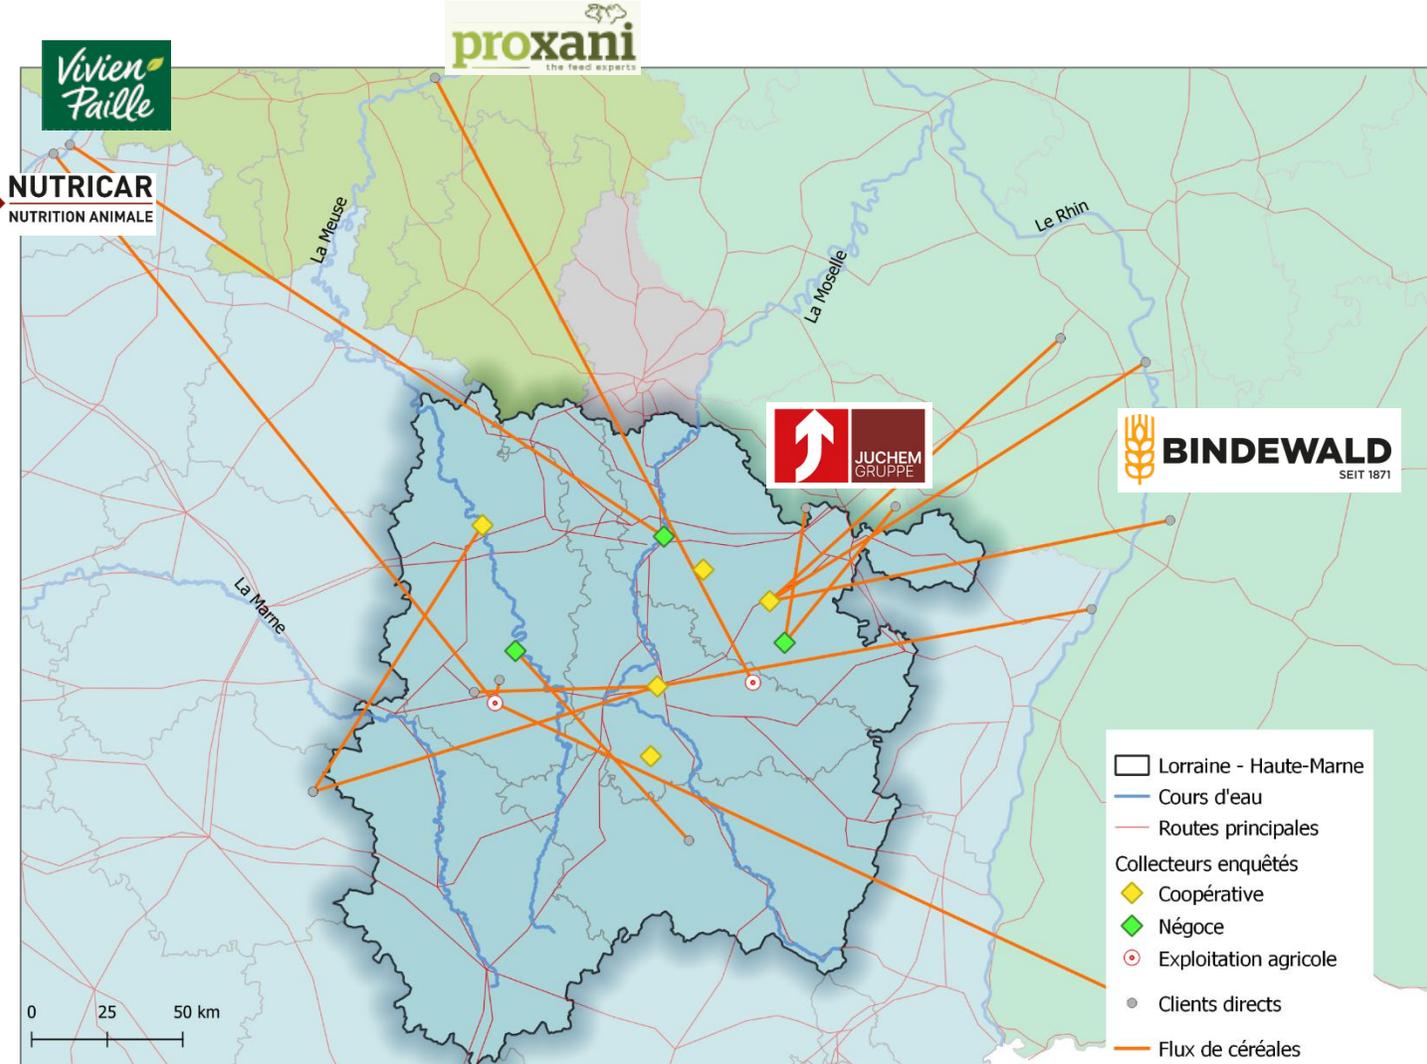

- Grain collectors have direct buyers in border countries : Germany, Belgium, Switzerland

A double cross-border sales strategy

Major outlets with cross-border companies

- Grain collectors have direct buyers in border countries : Germany, Belgium, Switzerland
- These buyers are grain-processing industry: flour milling, industrial bakery; animal feed factory; food factory (lentils)

A double cross-border sales strategy

Major outlets with cross-border companies

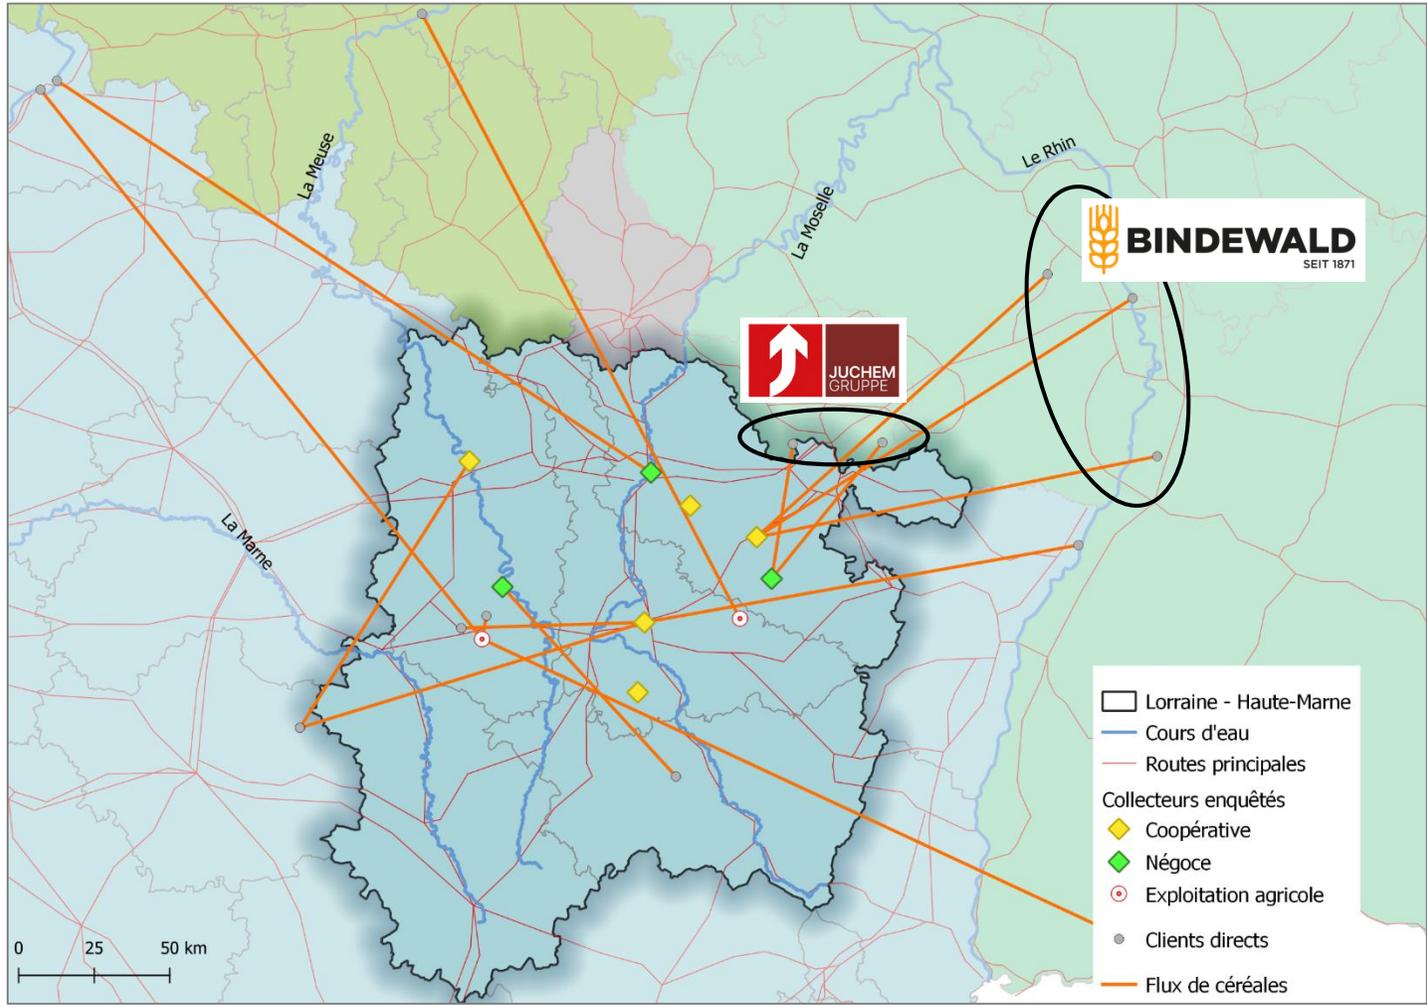

- Grain collectors have direct buyers in border countries : Germany, Belgium, Switzerland
- These buyers are grain-processing industry: flour milling, industrial bakery; animal feed factory; food factory (lentils)
- In the Moselle department, two grain collectors interviewed have their main buyers in Germany

*"Our only outlet today is **the Bindewald group in Germany**"*

GPB, 26/02/2024

*"So the **Juchem Group's** main mill produces flour for the food industry, which we began distributing to supermarkets in the 1970s, and **which has become a new market**"*

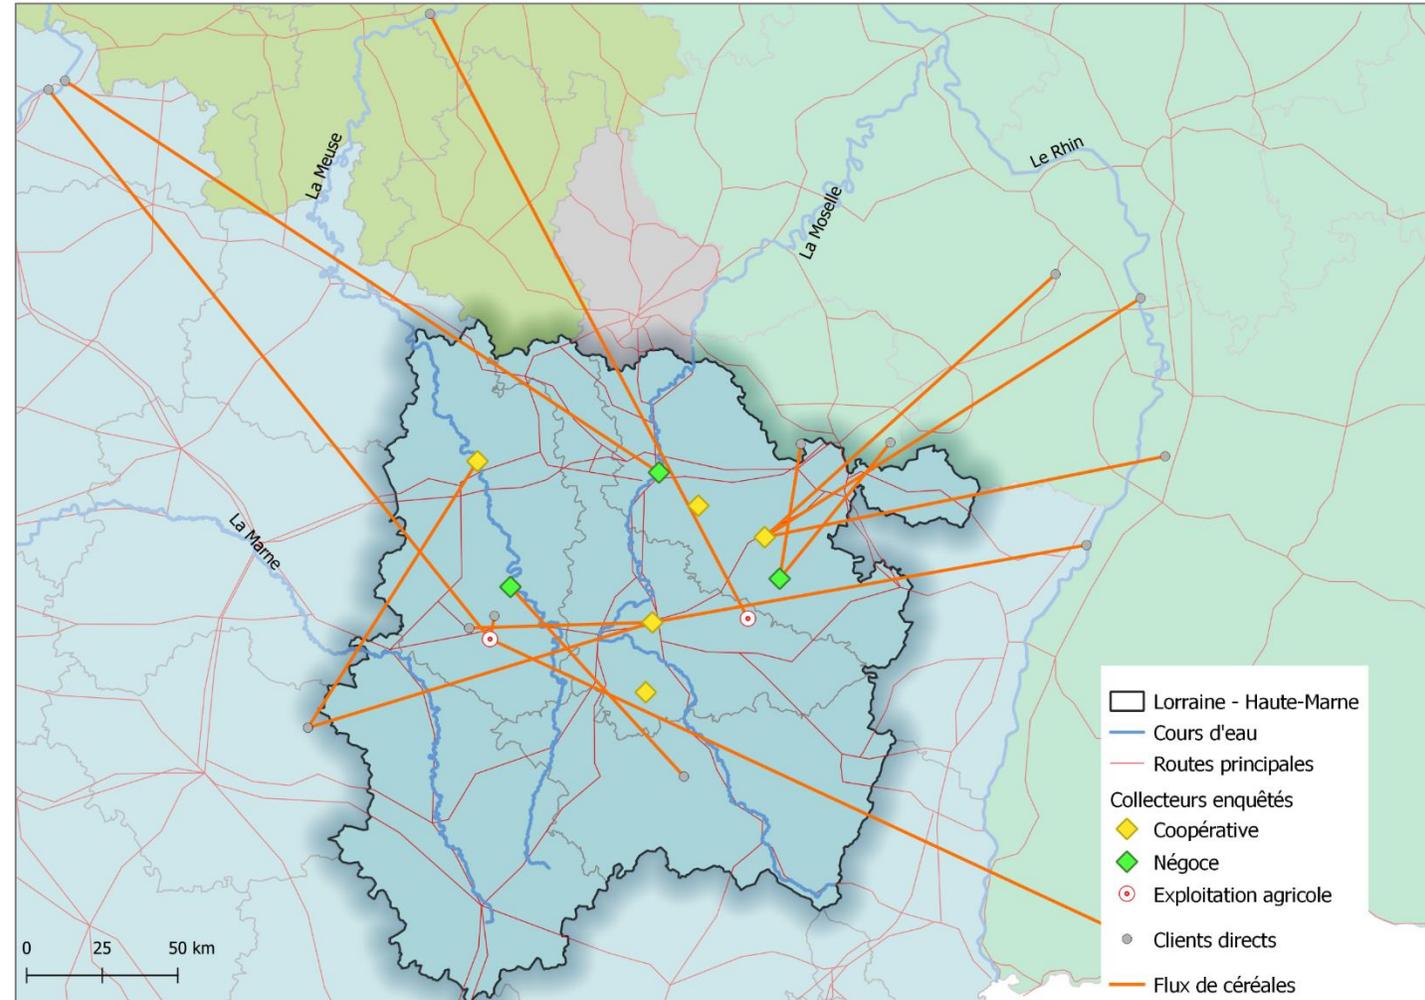

Nouvelle ELCA, 26/02/2024

A double cross-border sales strategy

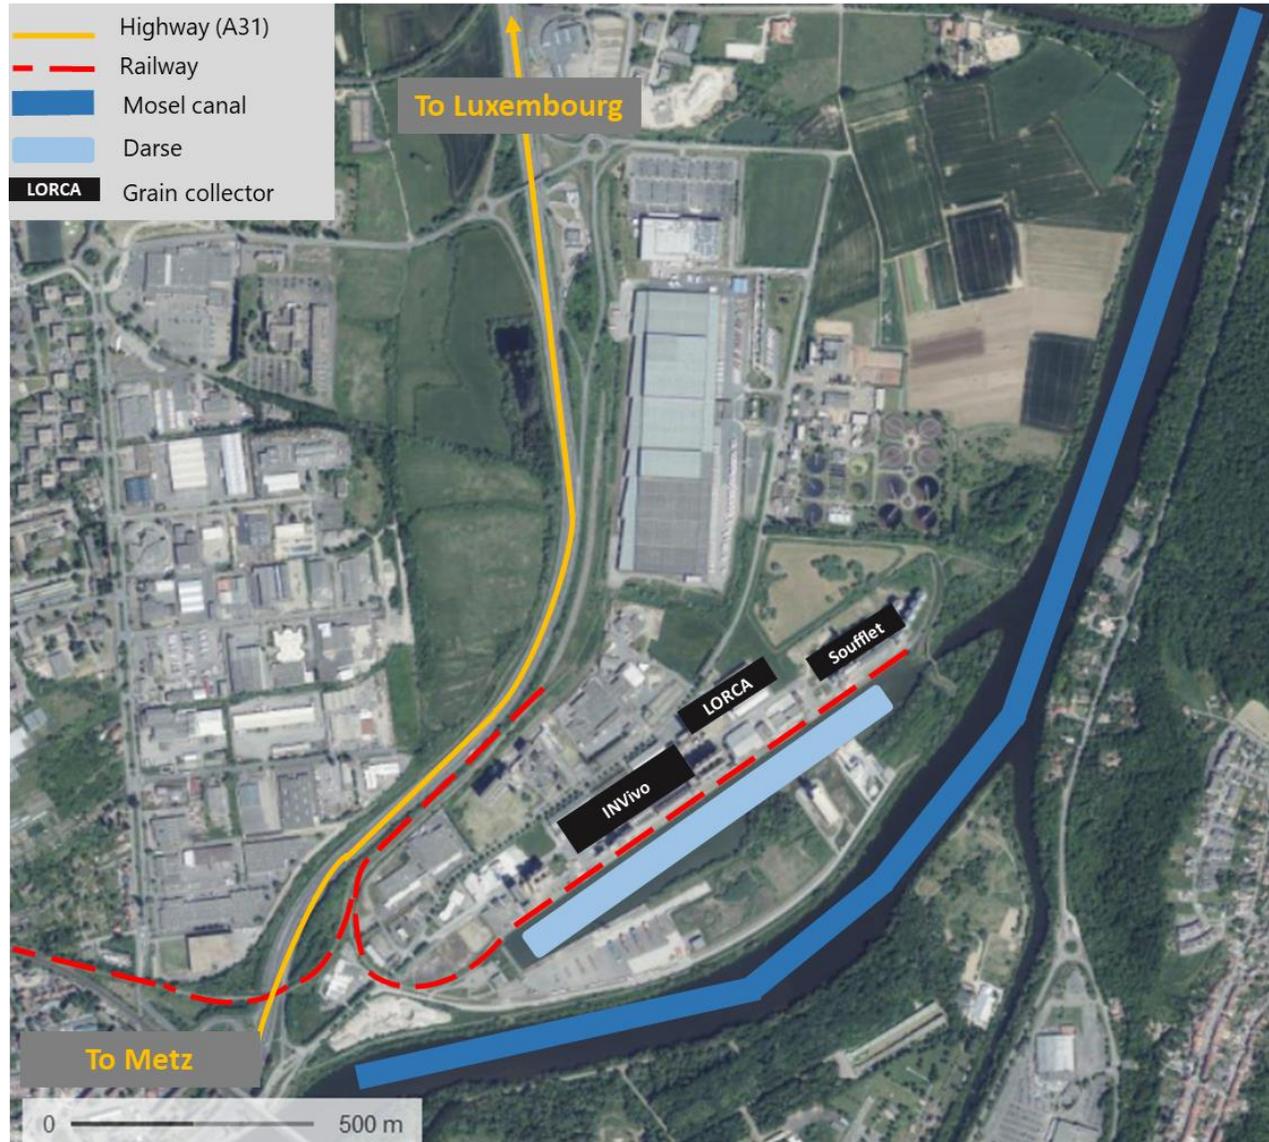

Major outlets with cross-border companies

- Grain collectors have direct buyers in border countries : Germany, Belgium, Switzerland
- These buyers are grain-processing industry: flour milling, industrial bakery; animal feed factory; food factory (lentils)
- In the Moselle department, two grain collectors interviewed have their main buyers in Germany
- Germany is a central outlet for Lorraine's agricultural sectors (de La Haye Saint Hilaire, 2023)

A double cross-border sales strategy

A strategy structured around the port of Metz and the Moselle canal

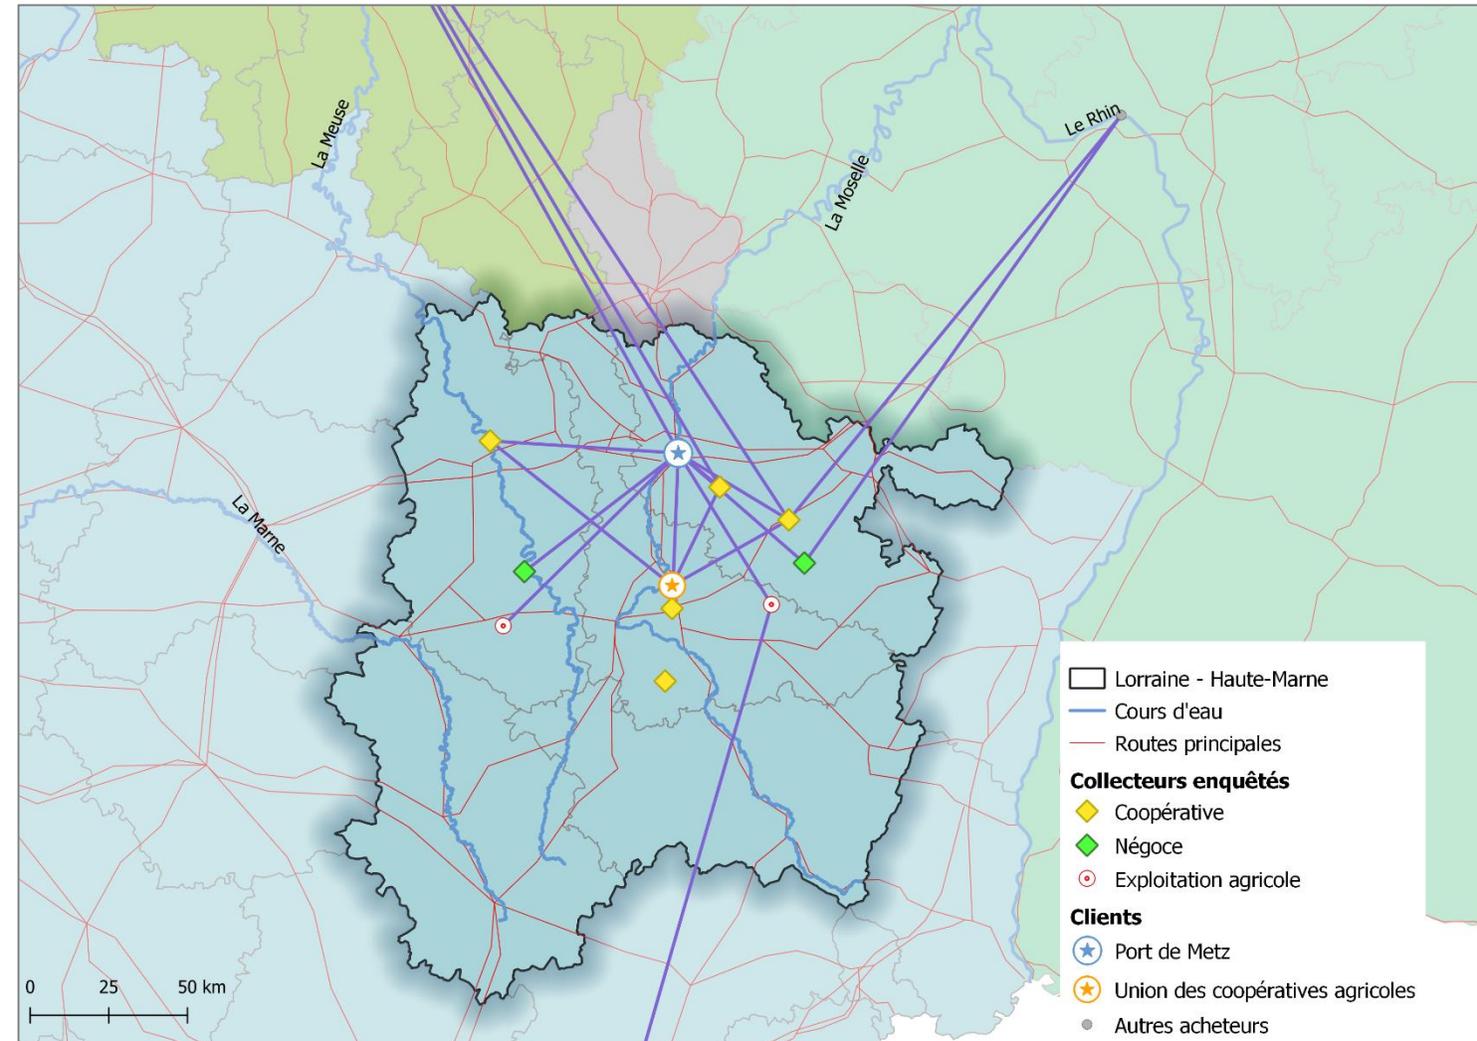

- France's leading river port for grain: 1,6 million tonnes of grain in 2022
- InVivo (cooperative union) and LORCA (Moselle cooperative)
- Serves North Community's port (Rotterdam, Antwerp) and countries (Belgium, Deutschland, Netherlands)

*"the Moselle canal and access to the Rhine are part of the national strategic plans for ports, and the **port of Metz is a strategic port for grain marketing.**"*
CAL, 18/01/2021

*"it's linked to our historical organization, which is **based exclusively on the Moselle river**"*
EMC2, 20/04/2021

A double cross-border sales strategy

A strategy structured around the port of Metz and the Moselle canal

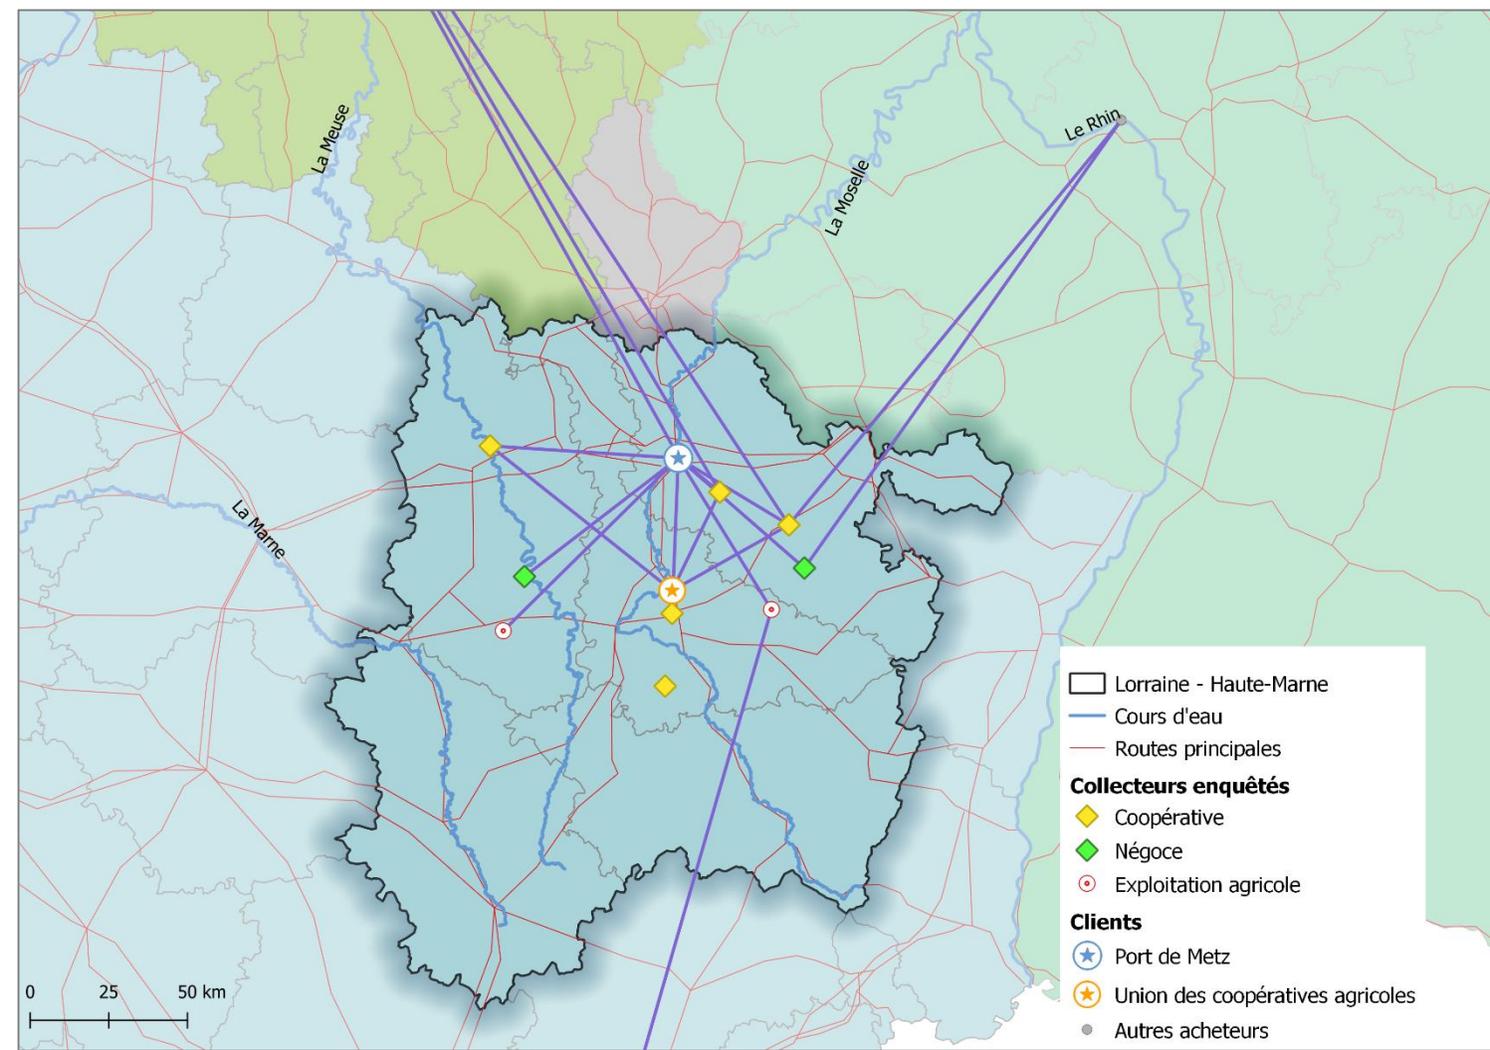

*"So we take all the cereals up there, putting 3,000 tonnes on a barge, which is **the most economical way of getting to the Belgian, Dutch and German fabs.**"*
EMC2, 20/04/2021

*"Historically, we have **the northern part of the European Union, which is the local market, neighboring countries, etc.**"*
CAL, 18/01/2021

A double cross-border sales strategy

A strategy structured around the port of Metz and the Moselle canal

*"So we take all the cereals up there, putting 3,000 tonnes on a barge, which is **the most economical way of getting to the Belgian, Dutch and German fabs.**"*
EMC2, 20/04/2021

*"Historically, we have **the northern part of the European Union, which is the local market, neighboring countries, etc.**"*
CAL, 18/01/2021

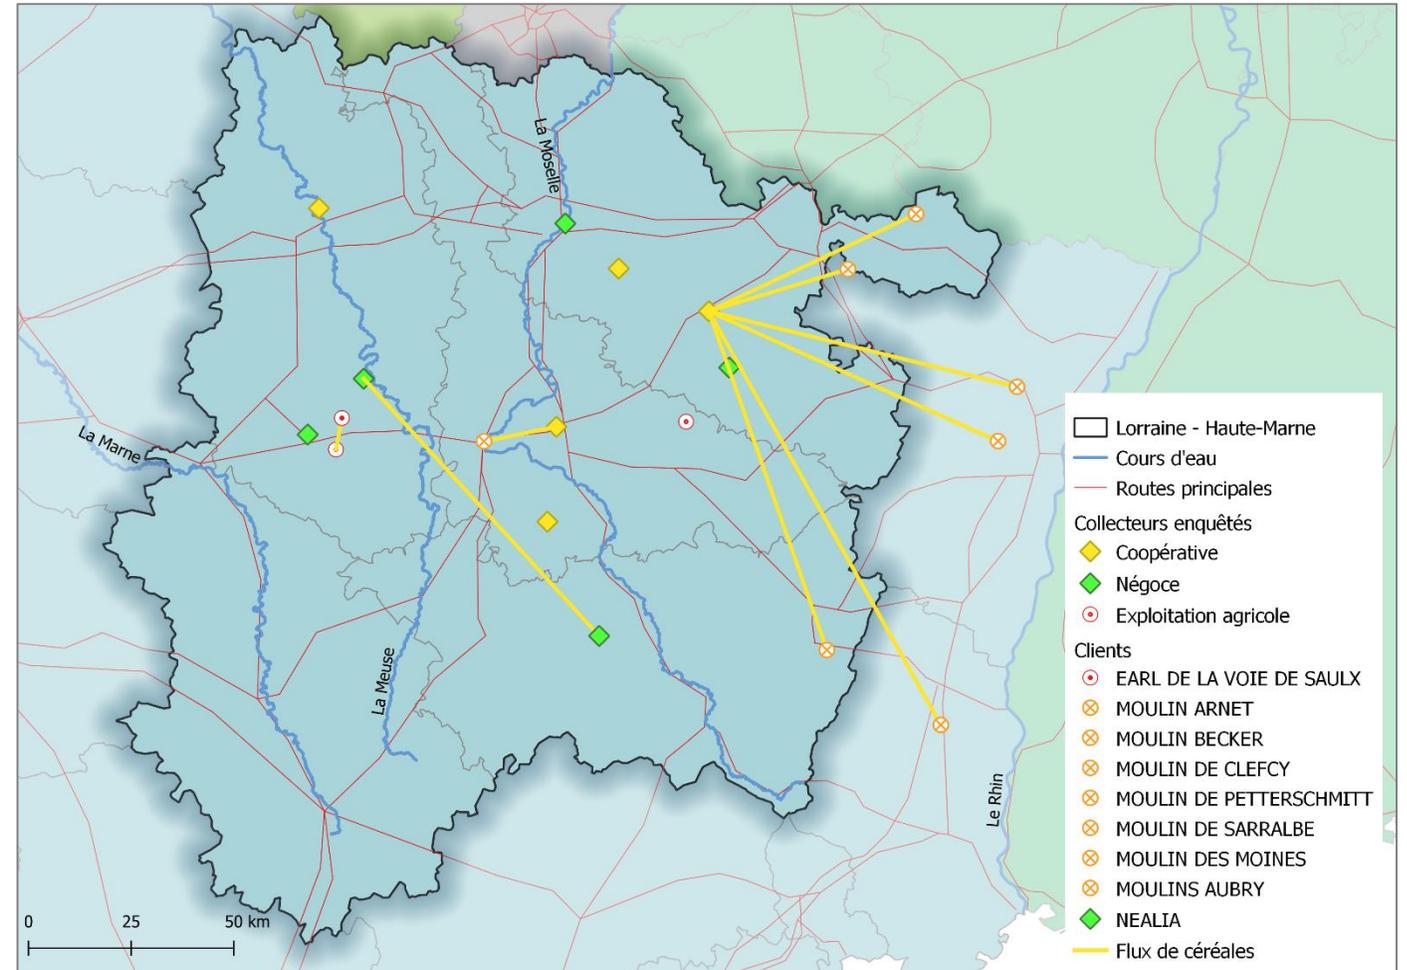

A production basin at the center of modernization and agro-industrial concentration

Increased dependency due to the closure of mills in Lorraine

"If we supply Clefcy it's still limited, even if we do Sarralbe it's going to represent 15% of our outlet if we do 7-8000 tons because it collects a little, we do Clefcy we do 2-3 small mills, it's not pejorative but it's going to be 200, 300, 400 tons"
GPB, 26/02/2024

"The Aubry mills are one of our big customers, well important local customers, we have a few like that but they account for 10 to 12% of CAL's cereal sales"
CAL, 18/01/2021

A production basin at the center of modernization and agro-industrial concentration

Increased dependency due to the closure of mills in Lorraine

Grands Moulins de Strasbourg, chronique d'une disparition annoncée

Publié le 14/03/2023

*Big Mills of Strasbourg, chronicle of a predicted disappearance

Accueil > Economie

Nancy *The factory « Grands Moulins de Paris » will close definitively before the summer

L'usine des Grands Moulins fermera définitivement avant cet été

C'est acté : le groupe de meunerie Grands Moulins de Paris, a confirmé la fermeture du site nancéien. Présente sur les rives de Meurthe depuis plus de 100 ans, l'usine de farine et de levain compte encore une trentaine de salariés. La question du devenir de ce lieu emblématique est déjà posée.

Stéphanie CHEFFER - 01 févr. 2022 à 05:00 | mis à jour le 24 févr. 2022 à 15:00 - Temps de lecture : 3 min

*one of Lorraine's last mills about to close on March 31

Saint-Maurice-sous-les-Côtes: l'un des derniers moulins de Lorraine fermera le 31 mars

Dans la Meuse à Saint-Maurice-sous-les-Côtes, le Moulin va fermer. © Jean-Christophe Panek, F3 Lorraine

"In its day, Strasbourg handled 200,000 tons of crushing [...] all the silos [in] southern Meurthe-et-Moselle, the outlet was Strasbourg. [...] Today, we no longer have any milling contacts in Lorraine Alsace."

GPB, 26/02/2024

"there was a great dynamic and added value. But today there are no more mills, the milling industry is completely dead"

Stophytra, 15/04/2024

Threats to the cross-border logic

- Climate change have an impact on the flow of grain: droughts on the Rhine leads to **periods of low water**, preventing the traffic of barges
- The Lorraine production basin also **competes with more productive areas** such as Black Sea countries, especially Ukraine and Russia

Les bateaux touchent le fond, le port fluvial de Metz fonctionne au ralenti à cause de la sécheresse

*Boats hit the bottom, port of Metz idles due to drought

<https://www.francebleu.fr/infos/economie-social/les-bateaux-touchent-le-fond-le-port-de-metz-fonctionne-au-ralenti-a-cause-de-la-secheresse-1660567482>

*"The **market is also looking elsewhere**. The countries of Eastern Europe, Russia, Ukraine, the whole Black Sea basin, we didn't talk about them too much 10-15 years ago. **They produce quality wheat**, milling wheat. We used to talk about the Black Sea only for feed wheat."*

Stophytra, 15/04/2024

Cross-border situation: an obstacle to the agri-food transition ?

*"In Lorraine, as we don't have any industrial facilities, **we're more concerned with the bulk of the market** [...], because here it goes to malting plants or livestock feed manufacturers. In the East, well around Metz, **we don't have too many specifications** of this type. [...] It's not open to everyone, because **you have to be close to a mill, close to a collector** who enters the chain, and that puts farmers who don't have access to these markets on the side of the road"*

Soufflet, 21/01/2021

*"**We don't have any specific specifications for cereals.** In the past, we tried to develop these specifications, but we often come back to the buyer's request. And we're in areas where **buyer demand doesn't require these specifications**"*

EMC2, 21/01/2021

Disruptive borderlands. Unpacking the innovative potential of transbordering practices, imaginaries and policies

Une double stratégie transfrontalière de commercialisation

« Par contre tout ce qui est la zone Est c'est des silos qui ont un débouché de proximité sur Strasbourg, et en fait Lunéville va principalement sur Strasbourg. Mais on est multimodal, c'est-à-dire qu'il n'y a pas un filon qui prend que du camion, que du fluvial et que du rail. » ; « Donc en fait on a des sites loin de la Moselle mais qui sont proches des clients historiques. » ; « Les moulins Aubry qui font partie de nos gros clients, enfin clients importants dans la proximité, on en a quelques-uns comme ça mais ça pèse 10 à 12 % de la vente des céréales de la CAL. » CAL

« Quand l'export tire pas on n'a très peu de marchés, et ça pour les années à venir, pour moi c'est très préoccupant. » GPB
